

## ESTIMATED 2018 Annual Taxable Distributions

The following table lists TIAA Investments Mutual Funds that are anticipated to make annual taxable capital gain distributions in 2018 along with the record date, ex-dividend date, payment date and estimated per share amount of the distribution. These estimates are based on portfolio information as of October 31, 2018. **Please note that these amounts are estimates and are subject to change by the date of the actual distribution. Such changes may be the result of tax adjustments and fluctuations in the shares outstanding on the record date of the actual distribution.** The distribution amounts do not include estimates for ordinary income

distributions. The final distribution amounts, which include ordinary income and capital gains, may be larger or smaller than what is estimated. Distributions from long-term capital gains are generally subject to tax at a rate of 15%. Distributions from short-term capital gains are generally taxed at higher ordinary income rates. The tax information contained herein is not intended to be used, and cannot be used, by any taxpayer for the purpose of avoiding tax penalties. It is for information purposes only. Nuveen does not provide tax advice. Consult your tax advisor regarding your particular situation.
