Put your investments to work

You’ve taken a big step in pursuing your financial goals by choosing TIAA-CREF Life Insurance Company (TIAA Life). Now, it’s time to figure out what kinds of investments you want to fund your variable insurance product.

Having the right asset allocation—or blend of investments like stocks, bonds and real estate—can help ensure your product selection is in sync with your goals and needs. It can also help you build a strategy that takes on the right amount of risk based on your preferences and timeline.

Design your plan in five simple steps

Use this guide to help you better understand what approach is right for you. Just answer some questions to identify your risk preferences, investment style and asset allocation. Then, choose one of our recommended portfolios—or build your own portfolio. You’ll then be ready to put your investment strategy in motion.

We’re ready to help you build your future

TIAA’s Investment Management Group (IMG) is a team of dedicated investment professionals. Using sophisticated tools, technology, experience and rigorous analysis, IMG also:

- Selects funds from the available lineup*
- Finds the best opportunities for potential growth
- Matches funds with asset allocation strategies to build model portfolios

* Fund selections from the available TIAA Life Variable Products Lineup TIAA.org/lifeperformance, TIAA.org/annuityperformance.

Don’t go it alone

Reach out to your TIAA advisor to help you navigate this guide.
Determine your risk tolerance

Use this risk tolerance questionnaire\(^1\) to help determine how comfortable you are with risk. Risk tolerance is based primarily on two factors: your time horizon (the years you expect to invest before you start withdrawing money) and attitude toward taking investment risks. In most cases, the shorter the investment period, the less risk the investor can afford to take. While many people feel more comfortable with less exposure to risk, it’s important to note that there is generally a relationship between risk and return, with potentially higher returns coming from riskier investments.

**Time horizon**

1. When do you expect to begin withdrawing money from your investment account? *(Choose one only)*
   a. Less than one year (0 points)
   b. 1 to 2 years (1 point)
   c. 3 to 4 years (3 points)
   d. 5 to 7 years (7 points)
   e. 8 to 10 years (9 points)
   f. 11 years or more (11 points)

2. Once you begin withdrawing money from your investment account, how long do you expect the withdrawals to last? *(Choose one only)*
   a. I plan to take a lump-sum distribution. (0 points)
   b. 1 to 4 years (2 points)
   c. 5 to 7 years (4 points)
   d. 8 to 10 years (5 points)
   e. 11 years or more (6 points)

**Score**

1. 

2. 

\[ \text{Time horizon score} = \text{Sum of scores from questions 1 and 2} \]

---

The risk of inflation

Inflation, the rise in prices over time, can erode your investment return. If portfolio returns are lower than the inflation rate, an investor’s future buying power might actually decline. However, portfolios with long-term returns that significantly beat inflation tend to be associated with a higher degree of risk.

Risk tolerance

3. Which of the following portfolios is most consistent with your investment philosophy?
   (Choose one only)
   a. **Portfolio A** seeks to exceed long-term inflation by a large margin and has a high degree of risk. (18 points)
   b. **Portfolio B** seeks to exceed long-term inflation by a moderate margin and has a high to moderate degree of risk. (12 points)
   c. **Portfolio C** seeks to exceed long-term inflation by a small margin and has a moderate degree of risk. (6 points)
   d. **Portfolio D** seeks to match the rate of long-term inflation and has a low degree of risk. (0 points)

4. Historically, portfolios with the highest average returns also tend to have the highest chance of short-term losses. The table below provides five hypothetical scenarios. Each of these scenarios offers a different degree of risk and reward over a one-year holding period. Please select the option with which you are most comfortable.²

<table>
<thead>
<tr>
<th>Hypothetical results at the end of one year</th>
</tr>
</thead>
<tbody>
<tr>
<td>Potential gain at the end of one year</td>
</tr>
<tr>
<td>-------------------------------------------</td>
</tr>
<tr>
<td><strong>Portfolio A</strong></td>
</tr>
<tr>
<td><strong>Portfolio B</strong></td>
</tr>
<tr>
<td><strong>Portfolio C</strong></td>
</tr>
<tr>
<td><strong>Portfolio D</strong></td>
</tr>
<tr>
<td><strong>Portfolio E</strong></td>
</tr>
</tbody>
</table>

² The maximum gain or loss on an investment is impossible to predict; results based on actual investments will vary. The ranges shown in the table are hypothetical and are designed solely to help determine an investor’s risk tolerance.
Risk tolerance (continued)

5. Which statement best describes your investment goals?
   a. **Protect the value of my account.** In order to minimize the chance for loss, I am willing to accept the lower long-term returns provided by conservative investments. (0 points)
   b. **Keep risk to a minimum** while trying to achieve slightly higher returns than the returns provided by investments that are more conservative. (5 points)
   c. **Long-term growth** is equally as important as managing portfolio risk. (10 points)
   d. **Maximize long-term investment returns.** I am willing to accept large and sometimes dramatic fluctuations in the value of my investments. (15 points)

6. Historically, markets have experienced downturns, both short-term and prolonged, followed by market recoveries. Suppose you owned a well-diversified portfolio that fell by 20% (i.e., $1,000 initial investment would now be worth $800) over a short period, consistent with the overall market. Assuming you still have 10 years until you begin withdrawals, how would you react?
   a. I would **not** change my portfolio. (15 points)
   b. I would **wait at least one year** before changing to options that are more conservative. (10 points)
   c. I would **wait at least three months** before changing to options that are more conservative. (5 points)
   d. I would **immediately** change to options that are more conservative. (0 points)

---

A well-diversified portfolio is typically invested in many different types of assets—to help reduce risk and seek consistent performance.\(^3\)

---

\(^3\) Diversification is a technique to help reduce risk. It is not guaranteed to protect against loss.
7. The following graph shows the hypothetical best and worst results of five sample portfolios over a one-year holding period. Note that the portfolio with the highest upside also has the largest potential downside. Which of the portfolios below would you prefer to hold?²

![Graph showing hypothetical returns of five portfolios over a one-year holding period]

a. Portfolio A (19 points)
b. Portfolio B (14 points)
c. Portfolio C (9 points)
d. Portfolio D (5 points)
e. Portfolio E (0 points)

8. I am comfortable with investments that may frequently experience large declines in value if there is a potential for higher returns. Does this describe you?

a. Agree (15 points)
b. Disagree (8 points)
c. Strongly Disagree (0 points)

Risk tolerance score
(Sum of scores from questions 3 to 8)
How to use your scores

Your scores will help determine which portfolio may suit you best. Your time horizon score is based on the length of time you can invest and potentially recover from market downturns. Typically, the shorter your time frame, the more conservative your recommended portfolio will be.

The risk tolerance score shows how much risk you’re willing to take. We combine these two scores to form a total score. Your total score directs you to a recommended portfolio, as indicated in this scoring grid.

To find your portfolio, plot your time horizon score from page 2 and your risk tolerance score from page 5 on the grid below. For example, if your time horizon score is 15 and your risk tolerance score is 56, your portfolio is 3.

<table>
<thead>
<tr>
<th>Time horizon score (from page 2)</th>
<th>Risk tolerance score (from page 5)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 - 16</td>
<td>1 - 2</td>
</tr>
<tr>
<td>17 - 39</td>
<td>3 - 5</td>
</tr>
<tr>
<td>40 - 65</td>
<td>6 - 7</td>
</tr>
<tr>
<td>66 - 87</td>
<td>8 - 10</td>
</tr>
<tr>
<td>88 - 100</td>
<td>11 +</td>
</tr>
</tbody>
</table>

Identify your investment style

Once you identify your risk tolerance, you can choose an investment style. Whether you prefer a more hands-on approach or want to go with the flow, there are two typical types of investment approaches: active or passive.4

Actively managed investments

Active fund managers make deliberate—or active—decisions to buy, sell or hold securities. They conduct their own research to determine a method to strive to outperform a recognized market index.

Passively managed investments

Passive fund managers try to match the performance of an index—not beat it. They do not make ongoing buy, sell and hold decisions based on their research.

What’s an index?

It’s a group of investments intended to represent a particular sector of the market. For example, the S&P 500®, one of the most well-known indexes, tracks 500 large companies on the New York Stock Exchange. You cannot invest directly in an index.

4 Please note that the terms active and passive refer to the management of the underlying funds in the portfolio models, and not the management of the overall models.
Finding your target allocation

Now, use your portfolio number from page 6 to find your target allocation. The pie charts below show suggested allocations based on different time horizons and levels of risk tolerance.5

**Portfolio 1 - Conservative**

The **Conservative** portfolio is designed to potentially provide stability and protection from loss to investors who either have a short time horizon and/or a primary goal of avoiding potential loss. The stability of this portfolio comes at the expense of achieving potentially higher long-term returns.

- 20% Domestic Stocks
- 10% International Stocks
- 69% Bonds/Fixed Income
- 1% Cash Equivalents

**Portfolio 2 - Moderate-Conservative**

The **Moderate-Conservative** portfolio primarily attempts to avoid short-term loss, but still seeks somewhat higher returns over the long term. To achieve higher potential returns, some fluctuations in investment value are to be expected.

- 30% Domestic Stocks
- 15% International Stocks
- 54% Bonds/Fixed Income
- 1% Cash Equivalents

**Portfolio 3 - Moderate**

The **Moderate** portfolio is designed for those who are equally concerned with risk and return. The objective for this portfolio is to provide returns that outpace inflation over the long term. Those using the suggested allocation for this portfolio should be comfortable with fluctuations in the portfolio’s value and occasional short-term loss.

- 39% Domestic Stocks
- 21% International Stocks
- 39% Bonds/Fixed Income
- 1% Cash Equivalents

**Portfolio 4 - Moderate-Aggressive**

The **Moderate-Aggressive** portfolio is designed for investors seeking greater accumulation over intermediate to long-term horizons. Those using the suggested allocation for this portfolio must be comfortable with more-than-average volatility and potential short-term losses to achieve the desired higher returns.

- 48% Domestic Stocks
- 25% International Stocks
- 26% Bonds/Fixed Income
- 1% Cash Equivalents

**Portfolio 5 - Aggressive**

The **Aggressive** portfolio is designed for investors seeking the potential for even greater returns over a long-term horizon. Those using the suggested allocation for this portfolio must be comfortable with experiencing frequent short-term loss and extreme volatility in portfolio value in exchange for potentially higher returns over the long term.

- 56% Domestic Stocks
- 31% International Stocks
- 12% Bonds/Fixed Income
- 1% Cash Equivalents

5 The portfolios provided by IMG, may not take into account your particular goals or preferences. Please note that no strategy can eliminate or anticipate all market risks, and losses can occur.
Consider a recommended portfolio or build your own

You can have your allocations match one of the IMG-built portfolios. Or, you can select your investments and choose how your assets are allocated starting on page 11. Consider working with your advisor to help you decide the right approach.

### About the firm

**Over 40 years in business**
- Formed in 2017 from the merger between Janus Capital Group and Henderson Group, we are committed to adding value through active management. For us, active is more than our investment approach – it is the way we translate ideas into action, how we communicate our views and the partnerships we build in order to create the best outcomes for clients.
- We are proud to offer a highly diversified range of products, harnessing the intellectual capital of some of the industry’s most innovative and formative thinkers. Our expertise encompasses the major asset classes, we have investment teams situated around the world and we serve intermediary, institutional and individual investors globally. We have US$328.5B in assets under management, more than 2,000 employees and offices in 28 cities worldwide. Headquartered in London, we are an independent asset manager that is dual-listed on the New York Stock Exchange and the Australian Securities Exchange.
- At Janus Henderson, we believe in the sharing of expert insight for better investment and business decisions. We call this ethos Knowledge. Shared. Knowledge. Shared is reflected both in how our investment teams interact and in our commitment to empowering clients in their decision-making. In our view, knowledge is powerful when it is shared.

$328.5 Billion Assets Under Management as of 12/31/18

### 50 years in business
- **Conviction:** Founded in 1969, Jennison Associates remains true to its founding principles as an active manager. We believe that sustainable alpha generation is possible through a combination of deep fundamental research, specialized investment teams, bottom-up portfolio construction, and high-conviction investing.
- **Focus:** Investment management is Jennison’s only business; our sole goal is to generate superior long-term investment outperformance. Our investment approach is based on rigorous fundamental research and results in conviction-based investing.
- **Culture:** Jennison is made up of deeply resourced, dedicated investment teams in which individual success is measured as collective investment outperformance on behalf of clients. Jennison equity portfolio managers average 28 years of industry experience and 17 years at the firm. Jennison equity research analysts average 19 years of industry experience and 11 years at the firm. Each investment capability is managed by dedicated portfolio managers who follow their own independent philosophy and process. Research ideas are collaboratively shared across teams and portfolios for the benefit of our clients.
- We believe a short-term focus often underestimates the potential magnitude and sustainability of company growth over the long term. Our fundamental research examines company and industry prospects over short and long terms, projecting how industries and businesses will change over time.
- **Stability:** Our investment culture and stable business model mean that we are completely focused on creating outperformance for clients; this has resulted in client relationships that span decades.

### Over 150 years of promises kept
- John Hancock Investments is a premier asset manager representing one of America’s most trusted brands, with a heritage of financial stewardship dating back to 1862. Helping our shareholders pursue their financial goals is at the core of everything we do. It’s why we support the role of professional financial advice and operate with the highest standards of conduct and integrity.
- We serve investors globally through a unique multimanager approach: We search the world to find proven portfolio teams with specialized expertise for every strategy we offer, then we apply robust investment oversight to ensure they continue to meet our uncompromising standards and serve the best interests of our shareholders.
- Our unique approach to asset management enables us to provide a diverse set of investments backed by some of the world’s best managers, along with strong risk-adjusted returns across asset classes.

About the firm

Over 75 years in business
- Neuberger Berman is a private, independent, employee-owned investment manager.
- With more than 500 investment professionals and over 2,000 employees in total, Neuberger Berman has built a diverse team of individuals united in their commitment to client outcomes and investment excellence.
- Founded in 1939 Neuberger Berman manages a range of equity, fixed income, private equity and hedge fund strategies on behalf of institutions, advisors and individual investors worldwide.

$304 Billion Assets Under Management as of 12/31/18

Over 45 years in business
- PIMCO is one of the world’s premier fixed income investment managers.
- With our launch in 1971 in Newport Beach, California, PIMCO introduced investors to a total return approach to fixed income investing. In the 45+ years since, we have continued to bring innovation and expertise to our partnerships with clients seeking the best investment solutions. Today we have offices across the globe and 2,500 professionals united by a single purpose: creating opportunities for investors in every environment.
- PIMCO partners with a wide range of institutions, including corporations, central banks, universities, endowments and foundations, and public and private pension and retirement plans. In addition we work with financial advisors and millions of individual investors pursuing personal financial goals, from preparing for retirement to funding higher education. Investing our clients’ assets is a tremendous responsibility, and for that reason there can be no shortcuts. We work relentlessly to help these investors reach their goals.
- Prepared. PIMCO believes that performance starts with preparation. We conduct exhaustive research and analysis to continuously evaluate the world’s changing risks and opportunities, from broad economic trends to individual securities. Our aim is to deliver forward-looking solutions that maximize the possibilities for our clients.
- Tested. There is no substitute for experience. Our distinctive top-down, bottom-up investment process has been tested in every market environment. That process is more than one person – it is fundamental to our firm and will guide our efforts on behalf of our clients.
- Invested. PIMCO believes there is nothing more important than the partnership with our clients. Markets don’t stand still and neither do we, innovating to build solutions to meet investors’ evolving needs. We are invested in helping our clients achieve what they set out to accomplish.

About the firm

Over 75 years in business
- In 1937, Thomas Rowe Price, Jr. founded our company based on a very simple business principle: What is good for the client is also good for the firm. To this day, T. Rowe Price adheres to the same principle.
- T. Rowe Price is an independent investment management firm helping institutional and individual investors worldwide reach their long-term goals.
- Building on a solid foundation: Organizational stability and a long-term orientation contribute to a proven business approach designed to produce strong performance.
- Disciplined by design: Fundamental, bottom-up research defines our investment approach and drives investment management excellence.
- Informed by multiple perspectives: Integrating the individual perspectives of talented, diverse professionals contributes to effective idea generation for client portfolios.

$962.3 Billion Assets Under Management as of 12/31/18

More than 40 years in business
- Royce & Associates, LP, investment adviser to The Royce Funds, is a small-cap specialist with unparalleled knowledge and experience.
- We are pioneers in small-cap investing—it’s been our specialty for 40+ years. What sets us apart is our unparalleled depth of small-cap knowledge, experience, and focus, combined with our culture of intellectual curiosity, creativity, and collaboration.
- This creates an environment where our team has the confidence to go against consensus, the insight to uncover opportunities others might miss, and the tenacity to stay the course through market cycles.
- Within a common culture we encourage our talented managers to refine their distinct investment approaches and offer strategies with different risk/return profiles. These distinct approaches offer clients clear choices to meet their specific small-cap needs. In our experience, successful investment demands commitment. We demonstrate our commitment by investing alongside you.
- Our team of 19 portfolio managers have significant personal investments in the strategies they manage.

### About the firm

**Changing the way the world invests for over 40 years**
- From its start in 1975, Vanguard has stood out as a very different kind of investment firm. Vanguard was founded on a simple but revolutionary idea—that a mutual fund company should be managed in the sole interest of its investors. Vanguard is owned by the Vanguard funds, which, in turn, are owned by their investors.
- This unique ownership structure and client-first philosophy have driven many distinctive business decisions that set us apart and enabled a track record of exceptional value: outstanding performance and service at low costs.
- Vanguard has grown to become one of the world’s largest investment management companies and is widely recognized as a steadfast advocate for the interests of all investors.
- Locations in the United States, Australia, the United Kingdom, Europe, Asia and the Americas.

Why TIAA Life?

We make it easy for you
We’ll help you find the right way to address your needs.

High ratings for financial strength”
We’re among the highest-rated insurance companies in the United States.
TIAA

For its stability, claims-paying ability and overall financial strength, TIAA-CREF Life Insurance Company is a member of one of only three insurance groups in the United States to hold the highest rating available to U.S. insurers from three of the four leading independent insurance company rating agencies. TIAA-CREF Life Insurance Company (TIAA Life) is a wholly owned subsidiary of Teachers Insurance and Annuity Association of America (TIAA). TIAA Life holds the following ratings as a result of its relationship with TIAA: A.M. Best (A++ as of 6/18), Fitch (AAA as of 6/18) and Standard & Poor's (AA+ as of 8/17), and the second highest possible rating from Moody's Investors Service (Aa1 as of 2/18). There is no guarantee that current ratings will be maintained. The financial strength ratings represent a company's ability to meet policyholders' obligations and claims and do not apply to variable annuities or any other product or service not fully backed by TIAA Life’s claims-paying ability. The ratings also do not apply to the safety or the performance of the variable accounts, which will fluctuate in value.

You should consider the investment objectives, risks, charges, and expenses carefully before investing. Please call 877-518-9161 or go to TIAA.org/prospectuses for current product and fund prospectuses that contain this and other information. Please read the prospectuses carefully before investing.

Please keep in mind that there are inherent risks associated with investing in securities. Investment products are not FDIC insured, may lose value and are not bank guaranteed. As with all securities, your accumulations can increase or decrease depending on how well the underlying investments perform over time. We do not guarantee the performance of the underlying investments. Please also note the following:

- You could lose money by investing in the TIAA-CREF Money Market Fund. Although the Fund seeks to preserve the value of your investment at $1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund’s sponsor has no legal obligation to provide support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.

- As a result of recent regulatory changes, the TIAA-CREF Money Market Fund converted to a “government money market fund” on October 14, 2016. The account invests at least 99.5% of its total assets in cash, government securities and/or repurchase agreements that are collateralized fully by cash or government securities. Review the Fund’s prospectus for more information.

- Funds that invest in foreign securities are subject to special risks, including currency fluctuation and political and economic instability.

- Investing in noninvestment-grade securities presents special risks, including significantly higher interest rate and credit risks.

- Funds that invest in fixed-income securities are not guaranteed and are subject to interest rate, inflation and credit risks.

- Small-cap and mid-cap stocks may have limited marketability and may be subject to more abrupt or erratic market movements than large-cap stocks.

- Real estate securities are subject to various risks, including fluctuations in property values, higher expenses or lower income than expected, and potential environmental problems and liability.

Intelligent Life Variable Universal Life (VUL) and Intelligent Life Survivorship Variable Universal Life (SVUL) are flexible premium variable universal life insurance policies. The policies offer a choice of investments and an opportunity for the cash value and death benefit to grow based on the investment results of the investment options. The policy value and the death benefit may go up or down on any given day. Due to various charges associated with life insurance contracts, the policies are not suitable as short-term investments.

Intelligent Life Variable Annuity is a variable deferred annuity. The annuity offers a choice of investments and the ability to accumulate funds tax deferred and then distributes funds as lifetime income or through other payment options.

Investment, insurance, and annuity products are not FDIC insured, are not bank guaranteed, are not deposits, are not insured by any federal government agency, are not a condition to any banking service or activity, and may lose value.

TIAA-CREF Individual & Institutional Services, LLC, member FINRA, distributes securities products. The Intelligent Variable Annuity, contract form series TCL-VA2; Intelligent Life Variable Universal Life Insurance, policy form series AM-SVUL.2 and AM-SVUL.3 (2008); and Intelligent Life Survivorship Variable Universal Life Insurance, policy form series AM-JVUL.3 (2008), are issued by TIAA-CREF Life Insurance Company (TIAA Life), a wholly owned subsidiary of Teachers Insurance and Annuity Association of America (TIAA). Each of the foregoing entities is solely responsible for its own financial condition and contractual obligations. Not available in all states.
