

TIAA-CREF Enhanced International Equity Index Fund

2Q 2018 | As of 30 Jun 2018

Effective 01 Aug 2018, the TIAA-CREF Enhanced International Equity Index Fund's name will be changed to TIAA-CREF Quant International Equity Fund.

Hypothetical Growth of \$10,000 – Institutional Class

The chart illustrates the performance of a hypothetical \$10,000 investment on 30 Jun 2008 and redeemed on 30 Jun 2018.

The total returns are not adjusted to reflect sales charges, the effects of taxation or redemption fees, but are adjusted to reflect actual ongoing expenses, and assume reinvestment of dividends and capital gains, net of all recurring costs.

Calendar Year Returns (%)

	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018 YTD
Advisor								0.08	25.80	-3.76
Institutional	26.95	9.78	-11.39	18.81	23.95	-4.08	-0.65	0.26	25.91	-3.76
MSCI EAFE Index	31.78	7.75	-12.14	17.32	22.78	-4.90	-0.81	1.00	25.03	-2.75
Morningstar Foreign Large Blend Average	30.91	10.25	-13.90	18.31	19.29	-5.16	-1.64	0.79	25.12	-3.06

Average Annualized Total Returns (%)

	Inception Date	1 Year	3 Years	5 Years	10 Years	Since Inception
Advisor	04 Dec 15	5.04				7.13
Institutional	30 Nov 07	5.27	4.66	6.36	2.91	1.38
MSCI EAFE Index		6.84	4.90	6.44	2.84	1.35
Morningstar Foreign Large Blend Average		6.08	4.56	5.92	2.61	

Past performance is no guarantee of future results. Investment returns and principal value will fluctuate so that shares redeemed may be worth more or less than their original cost. Current performance may be higher or lower than the performance shown. Total returns for a period of less than one year are cumulative. Returns without sales charges would be lower if the sales charges were included. Returns assume reinvestment of dividends and capital gains. For performance, current to the most recent month-end visit nuveen.com. Performance shown for benchmark since inception is as of the Fund's oldest share class.

Advisor Class shares are available for purchase through certain financial intermediaries and employee benefit plans. Institutional Class shares are available for purchase directly from the Fund by certain eligible investors (which include employee benefit plans and financial intermediaries).

Expense Ratios (%)

	Advisor	Institutional
Gross	0.50	0.41
Net	0.50	0.41

A contractual arrangement is in place that limits certain fees and/or expenses. Had fees/expenses not been limited ("capped"), currently or in the past, returns would have been lower. Expense Cap Expiration Date: 28 Feb 2019. Please see the prospectus for details.

Top Holdings (%)¹

	Fund net assets

¹ Positions are subject to change. The positions listed only include the Fund's long-term investments and may exclude any temporary cash investments and equity index products. Positions by issuer includes the underlying ordinary shares combined with any depositary receipts, preferred shares, contract for differences (CFDs), rights, options and warrants.

² Securities lending may be utilized, and in such cases the collateral is included in the Short-Term assets shown.

Portfolio Strategies

The Fund seeks a favorable long-term total return, mainly through capital appreciation, primarily from equity securities of foreign issuers. The Fund follows an enhanced index management strategy that seeks to enhance the Fund's performance relative to its benchmark index--while retaining a similar risk profile--instead of passively holding a representative basket of securities designed to match the index. The Fund's enhanced indexing strategies employ quantitative modeling techniques for stock selection, country allocation and portfolio construction. The management team will generally attempt to overweight securities that score high in the stock selection screening process and either not hold or underweight securities that score low in the screening process.

Morningstar Rankings and Percentiles

Category: Foreign Large Blend

	1 Year		3 Years		5 Years		10 Years	
	Rank	%	Rank	%	Rank	%	Rank	%
Advisor	521/774	70	–	–	–	–	–	–
Institutional	496/774	68	254/623	51	185/533	39	124/371	37

Morningstar Ranking/Number of Funds in Category displays the Fund's actual rank within its Morningstar Category based on average annual total return and number of funds in that Category. The returns assume reinvestment of dividends and do not reflect any applicable sales charge. Absent expense limitation, total return would be less.

Morningstar Percentile Rankings are the Fund's total return rank relative to all the funds in the same Morningstar category, where 1 is the highest percentile rank and 100 is the lowest percentile rank.

Portfolio Statistics

	Fund	Benchmark
Portfolio Net Assets	\$1.91 Billion	–
Beta (3 Years)	0.91	–
Weighted Average Market Cap (\$B)	\$59.19	\$60.88
P/E Ratio (1 Year Forecast)	11.71	13.24
Turnover Ratio (As of 31 Oct 17)	106%	–
Standard Deviation (3 Years)	11.30	12.09
Number of Positions	257	–

This data relates to the portfolio and the underlying securities held in the portfolio. It should not be construed as a measure of performance for the Fund itself.

Please refer to Portfolio Statistics Definitions Section.

Risk Statistics are calculated based on the Institutional Class and may vary for other classes.

About the Benchmark

MSCI EAFE® Index is a free float-adjusted market capitalization weighted index designed to measure developed market equity performance, excluding the U.S. and Canada. **It is not possible to invest directly in an index.**

A Word on Risk

Mutual fund investing involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. **Non-U.S. investments** involve risks such as currency fluctuation, political and economic instability, lack of liquidity and differing legal and accounting standards. Prices of **equity securities** may decline significantly over short or extended periods of time. As an **enhanced index** fund, the Fund may also underperform its benchmark index due to differences between the investments of the Fund and its benchmark index. The portfolio will generally reflect the performance of its target index even if the index does not perform well, and it may underperform the index after factoring in fees, expenses, transaction costs, and the size and timing of shareholder purchases and redemptions. Holdings selected by **quantitative analysis** may perform differently from the market as a whole based on the factors used in the analysis, the weighting of each factor, and how the factors have changed over time. These and other risk considerations, such as derivatives and issuer risks, are described in detail in the Fund's prospectus.

Before investing, carefully consider fund investment objectives, risks, charges and expenses. For this and other information that should be read carefully, please request a prospectus or summary prospectus from your financial professional or Nuveen at 800.752.8700 or visit nuveen.com.

This material is not intended to be a recommendation or investment advice, does not constitute a solicitation to buy, sell or hold a security or an investment strategy, and is not provided in a fiduciary capacity. The information provided does not take into account the specific objectives or circumstances of any particular investor, or suggest any specific course of action. Investment decisions should be made based on an investor's objectives and circumstances and in consultation with his or her advisors.

Portfolio Statistics Definitions

Beta is a measure of the volatility of a portfolio relative to the overall market. A beta less than 1.0 indicates lower risk than the market; a beta greater than 1.0 indicates higher risk than the market. **P/E Ratio** of a stock is calculated by dividing the current price of the stock by its forecasted 12 months' earnings per share. The average of the price/earnings ratio of a fund is a weighted harmonic average of all the current P/E ratios (excluding negatives) of the stocks in the Fund's portfolio. This should not be construed as a forecast of the Fund's performance. **Standard Deviation** is a statistical measure of the historical volatility of a mutual fund or portfolio; the higher the number the greater the risk. **Turnover Ratio** is calculated by dividing the lesser of purchases or sales by the average value of portfolio assets during a period. Turnover is based on the portfolio's fiscal year end and is not annualized if the reporting period covers less than 12 months. **Weighted Average Market Capitalization** is the portfolio-weighted mean capitalizations of all equity securities.
