

## TIAA-CREF Lifecycle Retirement Income Fund

2Q 2018 | As of 30 Jun 2018

### Hypothetical Growth of \$10,000 – Retirement Class

The chart illustrates the performance of a hypothetical \$10,000 investment on 30 Jun 2008 and redeemed on 30 Jun 2018.

The total returns are not adjusted to reflect sales charges, the effects of taxation or redemption fees, but are adjusted to reflect actual ongoing expenses, and assume reinvestment of dividends and capital gains, net of all recurring costs.

### Calendar Year Returns (%)

	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018 YTD
Retail	16.28	10.53	2.47	11.24	9.70	4.18	0.00	5.78	11.74	0.00
Retirement	16.08	10.44	2.41	11.27	9.70	4.18	0.09	5.69	11.75	0.00
Premier		10.54	2.64	11.34	9.69	4.38	0.10	5.89	11.84	0.05

Morningstar Target-Date Retirement Avg.	19.08	8.72	1.45	9.00	7.19	4.26	-1.75	5.10	8.81	-0.60

### Average Annualized Total Returns (%)

	Inception Date	1 Year	3 Years	5 Years	10 Years	Since Inception
Retail	30 Nov 07	5.45	5.02	5.81	5.56	4.77
Retirement	30 Nov 07	5.45	5.02	5.81	5.52	4.72
Premier	30 Sep 09	5.55	5.15	5.91		6.61
Advisor	04 Dec 15	5.68				6.36
Institutional	30 Nov 07	5.70	5.27	6.06	5.78	4.98
Lifecycle Retirement Income Fund Composite Index		5.00	4.86	5.64	5.58	4.89
S&P Target Date Retirement Income Index		4.23	4.08	4.56	4.50	3.82
Morningstar Target-Date Retirement Avg.		3.50	3.66	4.26	4.45	

**Past performance is no guarantee of future results.** Investment returns and principal value will fluctuate so that shares redeemed may be worth more or less than their original cost. Current performance may be higher or lower than the performance shown. Total returns for a period of less than one year are cumulative. Returns without sales charges would be lower if the sales charges were included. Returns assume reinvestment of dividends and capital gains. For performance, current to the most recent month-end visit [nuveen.com](http://nuveen.com). Performance shown for benchmark since inception is as of the Fund's oldest share class.

Retail Class shares are available for purchase through certain financial intermediaries or by contacting the Fund directly at 800.752.8700 or [nuveen.com](http://nuveen.com). Retirement Class and Premier Class shares are generally available for purchase through employee benefit plans or other types of savings plans or accounts. Advisor Class shares are available for purchase through certain financial intermediaries and employee benefit plans. Institutional Class shares are available for purchase directly from the Fund by certain eligible investors (which include employee benefit plans and financial intermediaries).

Previously, the Fund compared its performance to the Bloomberg Barclays U.S. Aggregate Bond Index instead of the S&P Target Date Retirement Income Index. The returns of the S&P Target Date Retirement Income Index are more appropriate for comparison purposes because they reflect multi-asset class exposure for the same target date as the Fund. For performance of the Bloomberg Barclays U.S. Aggregate Bond Index current to the most recent month-end visit [https://www.tiaa.org/public/pdf/performance/fps\\_report.pdf](https://www.tiaa.org/public/pdf/performance/fps_report.pdf).

### Expense Ratios (%)

	Retail	Retirement	Premier	Advisor	Institutional
Gross	0.82	0.79	0.69	0.62	0.54
Net	0.63	0.63	0.53	0.46	0.38

A contractual arrangement is in place that limits certain fees and/or expenses. Had fees/expenses not been limited ("capped"), currently or in the past, returns would have been lower. Expense Cap Expiration Date: 30 Sep 2018. Advisor has contractually agreed to waive the Fund's entire 0.10% Management fee. This waiver will remain in effect through 30 Sep 2020, unless changed with the approval of the Board of Trustees. The Management fee has been fully waived since the Fund's inception. Please see the prospectus for details.

The annual expense charge may include fees for the target date fund and fees for the underlying funds; in general, target date funds indirectly bear their pro rata share of the fees and expenses incurred by the underlying funds.

### Overall Morningstar Ratings™

Short-Term Investments, Other Assets & Liabilities, Net	0.40

<sup>1</sup> Positions are subject to change. The positions listed only include the Fund's long-term investments and may exclude any temporary cash investments and equity index products. Positions by issuer includes the underlying ordinary shares combined with any depositary receipts, preferred shares, contract for differences (CFDs), rights, options and warrants.

## Portfolio Strategies

The Lifecycle Retirement Income Fund seeks high total return over time primarily through income, with a secondary emphasis on capital appreciation. The Fund invests according to a relatively stable asset allocation strategy and is designed for investors who are already in or entering retirement. Each portfolio invests in several underlying equity, fixed-income and direct real estate funds. Currently, its target allocation consists of an equity/fixed-income/direct real estate mix of 35.0%/60.0%/5.0%. The Fund may deviate from these target allocations by up to 10% depending upon current market conditions and outlook.

John Cunniff, CFA, | Manager Tenure = 12 Years

## Morningstar Rankings and Percentiles

Category: Target-Date Retirement

	1 Year		3 Years		5 Years		10 Years	
	Rank	%	Rank	%	Rank	%	Rank	%
Retail	10/188	5	9/163	6	4/133	3	3/92	3
Retirement	9/188	5	8/163	5	3/133	2	4/92	5
Premier	7/188	3	6/163	4	2/133	1	–	–
Advisor	5/188	2	–	–	–	–	–	–
Institutional	4/188	2	4/163	3	1/133	1	1/92	1

Morningstar Ranking/Number of Funds in Category displays the Fund's actual rank within its Morningstar Category based on average annual total return and number of funds in that Category. The returns assume reinvestment of dividends and do not reflect any applicable sales charge. Absent expense limitation, total return would be less.

Morningstar Percentile Rankings are the Fund's total return rank relative to all the funds in the same Morningstar category, where 1 is the highest percentile rank and 100 is the lowest percentile rank.

## Portfolio Statistics

	Fund	Benchmark
Portfolio Net Assets	\$541.38 Million	–
Beta (3 Years)	1.08	–
Turnover Ratio (As of 31 May 17)	21%	–
Standard Deviation (3 Years)	4.72	4.32

This data relates to the portfolio and the underlying securities held in the portfolio. It should not be construed as a measure of performance for the Fund itself.

Please refer to Portfolio Statistics Definitions Section.

Risk Statistics are calculated based on the Retirement Class and may vary for other classes.

Data shown for benchmark is based on Composite Benchmark.

## About the Benchmark

**Lifecycle Retirement Income Fund Composite Index** is a composite of unmanaged benchmark indices that represent the market sectors in which the Fund invests across the equity and fixed-income asset classes. The Composite Index changes over time to correspond to changes in the Fund's target allocations, and provides a more relevant benchmark for the Fund's performance as compared to the Fund's unmanaged broad-based market indices. **S&P Target Date Retirement Income Index** represents a broadly derived consensus of asset class exposure for retirement income funds based on market observations acquired through an annual survey of target date fund managers. The S&P Target Date Retirement Income Index returns include the fees and expenses of the exchange-traded funds that comprise that index. **It is not possible to invest directly in an index.**

## A Word on Risk

Mutual fund investing involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Target date mutual funds are actively managed, so the **asset allocation** is subject to change and may vary from that shown. The Fund is a fund of funds subject to the risks of its **underlying funds** in proportion to each Fund's allocation. These risks include those of **fixed-income** underlying funds risks which may be susceptible to general movements in the bond market and are subject to credit and interest rate risks as well as those of **equity** underlying funds risks, such as foreign investment and issuer risks. **Credit risk** arises from an issuer's ability to make interest and principal payments when due, as well as the prices of bonds declining when an issuer's credit quality is expected to deteriorate. **Interest rate risk** occurs when interest rates rise causing bond prices to fall. The Fund's **income** could decline during periods of falling interest rates. **Non-U.S. investments** involve risks such as currency fluctuation, political and economic instability, lack of liquidity and differing legal and accounting standards. These fixed-income underlying funds risks, such as call, extension, and income volatility risks as well as other risk considerations, such as active management risk, equity underlying funds risks and direct real estate risks, are described in detail in the Fund's prospectus.

The principal value of the fund(s) is not guaranteed at any time, including at the target date.

**Before investing, carefully consider fund investment objectives, risks, charges and expenses. For this and other information that should be read carefully, please request a prospectus or summary prospectus from your financial professional or Nuveen at 800.752.8700 or visit [nuveen.com](http://nuveen.com).**

The information provided does not take into account the specific objectives or circumstances of any particular investor, or suggest any specific course of action. Investment decisions should be made based on an investor's objectives and circumstances and in consultation with his or her advisors.

## Morningstar Disclosure

For the period ended 30 Jun 2018, Morningstar rated this Fund's Retail, Retirement, Premier and Institutional shares, for the overall, three-, five-, and 10-year periods (if applicable). The Retail shares received 5, 5, 5 and 5 stars, Retirement shares received 5, 5, 5 and 5 stars, Premier shares received 5, 5, 5 and 5 stars and the Institutional shares received 5, 5, 5 and 5 stars among 163, 163, 133, and 92 Target-Date Retirement Funds, respectively. Rankings for other share classes may vary. Investment performance reflects applicable fee waivers. Without such waivers, total returns would be reduced and ratings could be lower. For the most current ratings, please visit [nuveen.com](http://nuveen.com).

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. ©2018 Morningstar, Inc. ## Portfolio Statistics Definitions

**Beta** is a measure of the volatility of a portfolio relative to the overall market. A beta less than 1.0 indicates lower risk than the market; a beta greater than 1.0 indicates higher risk than the market. **Standard Deviation** is a statistical measure of the historical volatility of a mutual fund or portfolio; the higher the number the greater the risk. **Turnover Ratio** is calculated by dividing the lesser of purchases or sales by the average value of portfolio assets during a period. Turnover is based on the portfolio's fiscal year end and is not annualized if the reporting period covers less than 12 months.

The investment advisory services, strategies and expertise of TIAA Investments, a division of Nuveen, are provided by Teachers Advisors, LLC and TIAA-CREF Investment Management, LLC.
