

## TIAA-CREF Lifecycle 2045 Fund

2Q 2018 | As of 30 Jun 2018

### Hypothetical Growth of \$10,000 – Retirement Class

The chart illustrates the performance of a hypothetical \$10,000 investment on 30 Jun 2008 and redeemed on 30 Jun 2018.

The total returns are not adjusted to reflect sales charges, the effects of taxation or redemption fees, but are adjusted to reflect actual ongoing expenses, and assume reinvestment of dividends and capital gains, net of all recurring costs.

### Calendar Year Returns (%)

	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018 YTD
Retirement	28.28	15.10	-3.88	17.26	25.98	4.28	-0.12	7.77	23.41	1.27
Premier		15.21	-3.72	17.32	26.07	4.48	-0.01	7.85	23.45	1.27
Advisor								8.05	23.70	1.34
Institutional	28.57	15.40	-3.63	17.56	26.25	4.61	0.13	8.06	23.62	1.42
Lifecycle 2045 Fund Composite Index	26.98	14.07	-1.39	15.54	25.52	7.30	-1.08	9.72	21.18	0.91
S&P Target Date 2045 Index	26.40	15.62	-2.56	15.15	23.14	5.67	-0.46	9.54	19.56	0.70
Morningstar Target-Date 2045 Average	30.93	14.83	-4.10	15.52	22.01	5.34	-1.81	7.93	20.51	0.45

### Average Annualized Total Returns (%)

	Inception Date	1 Year	3 Years	5 Years	10 Years	Since Inception
Retirement	30 Nov 07	12.60	8.89	10.29	7.38	5.67
Premier	30 Sep 09	12.67	8.98	10.41		10.58
Advisor	04 Dec 15	12.92				11.41
Institutional	30 Nov 07	12.94	9.14	10.58	7.66	5.94
Lifecycle 2045 Fund Composite Index		11.42	9.04	10.36	7.80	6.23
S&P Target Date 2045 Index		10.55	8.52	9.59	7.27	5.67
Morningstar Target-Date 2045 Average		10.12	7.79	9.06	6.78	

**Past performance is no guarantee of future results.** Investment returns and principal value will fluctuate so that shares redeemed may be worth more or less than their original cost. Current performance may be higher or lower than the performance shown. Total returns for a period of less than one year are cumulative. Returns without sales charges would be lower if the sales charges were included. Returns assume reinvestment of dividends and capital gains. For performance, current to the most recent month-end visit [nuveen.com](http://nuveen.com). Performance shown for benchmark since inception is as of the Fund's oldest share class.

Retirement Class and Premier Class shares are generally available for purchase through employee benefit plans or other types of savings plans or accounts. Advisor Class shares are available for purchase through certain financial intermediaries and employee benefit plans. Institutional Class shares are available for purchase directly from the Fund by certain eligible investors (which include employee benefit plans and financial intermediaries).

Previously, the Fund compared its performance to the Russell 3000 Index instead of the S&P Target Date 2045 Index. The returns of the S&P Target Date 2045 Index are more appropriate for comparison purposes because they reflect multi-asset class exposure for the same target date as the Fund. For performance of the Russell 3000 Index current to the most recent month-end visit [https://www.tiaa.org/public/pdf/performance/ips\\_report.pdf](https://www.tiaa.org/public/pdf/performance/ips_report.pdf).

### Expense Ratios (%)

	Retirement	Premier	Advisor	Institutional
Gross	0.82	0.72	0.65	0.57
Net	0.70	0.60	0.53	0.45

A contractual arrangement is in place that limits certain fees and/or expenses. Had fees/expenses not been limited ("capped"), currently or in the past, returns would have been lower. Expense Cap Expiration Date: 30 Sep 2018. Advisor has contractually agreed to waive the Fund's entire 0.10% Management fee. This waiver will remain in effect through 30 Sep 2020, unless changed with the approval of the Board of Trustees. The Management fee has been fully waived since the Fund's inception. Please see the prospectus for details.

The annual expense charge may include fees for the target date fund and fees for the underlying funds; in general, target date funds indirectly bear their pro rata share of the fees and expenses incurred by the underlying funds.

### Overall Morningstar Ratings™

Category: Target-Date 2045

RETIREMENT ★★★★★

PREMIER ★★★★★

INSTITUTIONAL ★★★★★

Among 173 funds based on risk-adjusted returns as of 30 Jun 2018

Morningstar ratings may vary among share classes and are based on historical risk-adjusted total returns, which are not indicative of future results.

### Top Holdings (%)<sup>1</sup>

	Fund net assets

<sup>1</sup> Positions are subject to change. The positions listed only include the Fund's long-term investments and may exclude any temporary cash investments and equity index products. Positions by issuer includes the underlying ordinary shares combined with any depositary receipts, preferred shares, contract for differences (CFDs), rights, options and warrants.

## Portfolio Strategies

The Lifecycle 2045 Fund seeks high total return over time through a combination of capital appreciation and income. Each of the TIAA-CREF Lifecycle Funds is designed to provide a single diversified portfolio managed with a target retirement date in mind. The target date is the approximate date when investors expect to begin withdrawing money from the Fund. Each portfolio invests in several underlying equity, fixed-income and direct real estate funds. Currently, the Lifecycle 2045 Fund's target allocation consists of an equity/fixed-income/direct real estate mix of approximately 90.5%/4.5%/5.0%. Over time, the Fund's target allocation will gradually become more conservative, reaching an equity/fixed-income/direct real estate mix of approximately 35.0%/60.0%/5.0% between 2052-2055. The Fund may deviate from these target allocations by up to 10% depending upon current market conditions and outlook.

## Morningstar Rankings and Percentiles

Category: Target-Date 2045

	1 Year		3 Years		5 Years		10 Years	
	Rank	%	Rank	%	Rank	%	Rank	%
Retirement	13/217	4	14/173	5	10/133	7	13/66	23
Premier	11/217	3	11/173	4	7/133	4	–	–
Advisor	6/217	2	–	–	–	–	–	–
Institutional	4/217	1	8/173	2	6/133	4	12/66	20

Morningstar Ranking/Number of Funds in Category displays the Fund's actual rank within its Morningstar Category based on average annual total return and number of funds in that Category. The returns assume reinvestment of dividends and do not reflect any applicable sales charge. Absent expense limitation, total return would be less.

Morningstar Percentile Rankings are the Fund's total return rank relative to all the funds in the same Morningstar category, where 1 is the highest percentile rank and 100 is the lowest percentile rank.

## Portfolio Statistics

	Fund	Benchmark
Portfolio Net Assets	\$2.82 Billion	–
Beta (3 Years)	1.03	–
Turnover Ratio (As of 31 May 17)	23%	–
Standard Deviation (3 Years)	9.76	9.39

This data relates to the portfolio and the underlying securities held in the portfolio. It should not be construed as a measure of performance for the Fund itself.

Please refer to Portfolio Statistics Definitions Section.

Risk Statistics are calculated based on the Retirement Class and may vary for other classes.

Data shown for benchmark is based on Composite Benchmark.

## About the Benchmark

**Lifecycle 2045 Fund Composite Index** is a composite of unmanaged benchmark indices that represent the market sectors in which the Fund invests across the equity and fixed-income asset classes. The Composite Index changes over time to correspond to changes in the Fund's target allocations, and provides a more relevant benchmark for the Fund's performance as compared to the Fund's unmanaged broad-based market indices. **S&P Target Date 2045 Index** represents a broadly derived consensus of asset class exposure for the 2045 target retirement date based on market observations acquired through an annual survey of target date fund managers. The S&P Target Date 2045 Index returns include the fees and expenses of the exchange-traded funds that comprise that index. **It is not possible to invest directly in an index.**

## A Word on Risk

Mutual fund investing involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved and the **target date** is an approximate date when investors may begin withdrawing from the Fund. Target date mutual funds are actively managed, so the **asset allocation** is subject to change and may vary from that shown and after the target date has been reached, the Fund may be merged into another with a more stable asset allocation. The Fund is a fund of funds subject to the risks of its **underlying funds** in proportion to each Fund's allocation. These risks include those of **fixed-income** underlying funds risks which may be susceptible to general movements in the bond market and are subject to credit and interest rate risks as well as those of **equity** underlying funds risks, such as foreign investment and issuer risks. **Credit risk** arises from an issuer's ability to make interest and principal payments when due, as well as the prices of bonds declining when an issuer's credit quality is expected to deteriorate. **Interest rate risk** occurs when interest rates rise causing bond prices to fall. The Fund's **income** could decline during periods of falling interest rates. **Non-U.S. investments** involve risks such as currency fluctuation, political and economic instability, lack of liquidity and differing legal and accounting standards. These fixed-income underlying funds risks, such as call, extension, and income volatility risks as well as other risk considerations, such as active management risk, equity underlying funds risks and direct real estate risks, are described in detail in the Fund's prospectus.

The principal value of the fund(s) is not guaranteed at any time, including at the target date.

**Before investing, carefully consider fund investment objectives, risks, charges and expenses. For this and other information that should be read carefully, please request a prospectus or summary prospectus from your financial professional or Nuveen at 800.752.8700 or visit nuveen.com.**

## Morningstar Disclosure

For the period ended 30 Jun 2018, Morningstar rated this Fund's Retirement, Premier and Institutional shares, for the overall, three-, five-, and 10-year periods (if applicable). The Retirement shares received 5, 5, 5 and 4 stars, Premier shares received 5, 5, 5 and 4 stars and the Institutional shares received 5, 5, 5 and 4 stars among 173, 173, 133, and 66 Target-Date 2045 Funds, respectively. Rankings for other share classes may vary. Investment performance reflects applicable fee waivers. Without such waivers, total returns would be reduced and ratings could be lower. For the most current ratings, please visit nuveen.com.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. ©2018 Morningstar, Inc. ## Portfolio Statistics Definitions

**Beta** is a measure of the volatility of a portfolio relative to the overall market. A beta less than 1.0 indicates lower risk than the market; a beta greater than 1.0 indicates higher risk than the market. **Standard Deviation** is a statistical measure of the historical volatility of a mutual fund or portfolio; the higher the number the greater the risk. **Turnover Ratio** is calculated by dividing the lesser of purchases or sales by the average value of portfolio assets during a period. Turnover is based on the portfolio's fiscal year end and is not annualized if the reporting period covers less than 12 months.

The investment advisory services, strategies and expertise of TIAA Investments, a division of Nuveen, are provided by Teachers Advisors, LLC and TIAA-CREF Investment Management, LLC.
