Investment objective

The Fund seeks high total return over time through a combination of capital appreciation and income.

Investment philosophy

The portfolio management team employs a long-term investment philosophy that seeks to ensure that the Fund provides an effective, convenient means to pursue financial security leading up to and throughout retirement. They believe an outcome-based focus, with careful attention to risk management and diversification, helps keep the TIAA-CREF Lifecycle 2050 Fund on track to meet its objectives.

Key distinctions

- Expertise and scale of asset management organization provides the portfolio management team with insights into the equity and fixed-income markets, as well as centralized research teams of expert industry analysts with global reach and perspective.
- Glidepath design based on experiences managing retirement assets for nearly 100 years
- Fees generally rank in the bottom quartile of target-date industry peers.³

Lifecycle 2050 Fund Glidepath

¹ For Retirement Class.

² The Lifecycle 2050 Fund Composite Index represents the general market sectors in which the Fund may invest. The Fund's composite benchmark combines the following public indices in proportions that reflect the Fund's target allocations: Russell 3000® Index, MSCI ACWI ex-USA Index, Barclays Capital U.S. Aggregate Bond Index, Barclays Capital U.S. 1-3 Year Government Credit Bond Index, Barclays Capital U.S. Treasury Inflation-Protected Securities Index (Series L). Each index is unmanaged and reflects no deductions for fees, expenses or taxes. You cannot invest directly in any index.

³ Source: Morningstar Direct as of September 30, 2014. The Lifecycle 2050 Fund-Institutional Class ranks in the bottom 5th percentile in terms of expenses among the Morningstar U.S. Open End Target Date 2046-2050 (category average 106bps/median 103bps).

Financial Services

Investment process

The Lifecycle 2050 Fund is managed according to an asset allocation strategy informed by more than 60 years of asset allocation experience. TIAA-CREF's proprietary modeling process is designed to meet retirement objectives during periods of retirement savings and retirement income withdrawals.

Equity allocation strategy

- Overall equity exposure starts at 90% and ends at 40%.
- Targeted exposure across regions, market caps and styles
- 70% U.S. and 30% international exposure
- International exposure includes developed and emerging markets.

Fixed-income allocation strategy

- Overall fixed-income exposure starts at 10% and ends at 60%.
- Includes intermediate, short-term and inflation-protected assets
- Higher allocations to core-plus strategy for early savings periods, including high-yield bonds and emerging markets debt
- An increase in inflation-linked and short-term bond allocations as the Fund approaches the target retirement date

Risk management strategy

Risk management controls are in place to ensure that the allocations to the underlying funds efficiently track the target allocations and that cash is kept to extremely low levels. Because the degree of active risk represented by each underlying fund varies, the allocations to each underlying fund are determined in a way that enables a targeted level of tracking error to be maintained in proportion to the overall risk budget targeted for each fund.

Hans Erickson, Managing Director

- Joined TIAA-CREF in 1996
- 28 years of investment experience

John Cunniff, Managing Director

- Joined TIAA-CREF in 2006
- 24 years of industry experience

About TIAA-CREF Asset Management

Born from a legacy of making a difference, TIAA-CREF Asset Management has been committed to serving the best interests of our institutional, intermediary and individual clients for nearly 100 years. Among the world's largest global managers, TIAA-CREF Asset Management draws on deep expertise to deliver long-term performance across multiple asset classes: fixed income, equities, directly owned real estate and alternatives.

Call **800 842-2252** or visit **tiaa-cref.org** to learn more about us today.

Tracking error is defined as the divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark.

Target-date mutual funds share the risks associated with the types of securities held by each of the underlying funds in which they invest. As with all mutual funds, the principal value isn't guaranteed. Also, please note that the target date is an approximate date when investors may begin withdrawing from the Fund. Target-date mutual funds are actively managed, so their asset allocations are subject to change and may vary from those shown. After the target date has been reached, some of these funds may be merged into a fund with a more stable asset allocation.

You should consider the investment objectives, risks, charges and expenses carefully before investing. Please call 877 518-9161 or go to tiaa-cref.org for a current prospectus that contains this and other information. Please read the prospectus carefully before investing.
