TIAA Private Asset Management

The journey to financial well-being starts with you
What are your financial goals? What does financial well-being mean to you? What do you want to leave as your legacy?

Questions about managing your wealth are as personal and individual as you are. But that doesn’t mean you need to solve them on your own.

You and TIAA

At TIAA, we put a team of specialists behind you and your goals. People you can trust to ask the right questions, listen and advise you. People who take the time to understand your concerns and responsibilities—and what matters most to you.

Managing your wealth can be a complicated and time-consuming process. Private Asset Management is dedicated to guiding and helping you invest and manage your assets.

We understand that financial well-being involves more than balancing risk and return or selecting the right investments. It takes a well-defined plan, a disciplined process and a commitment to helping you pursue your goals every step along the way.

The journey to financial well-being can be challenging—and it’s important for you to feel comfortable with how your money is managed. With Private Asset Management, you benefit from all the research, technology and resources of TIAA.

We’ll help you overcome one or more challenges that you may be facing:

- Manage assets in a risk appropriate and tax-efficient manner.
- Draw assets in an efficient manner.
- Efficiently transfer wealth to the next generation and philanthropic interests.
- Maintaining financial well-being if you were to become mentally impaired or to carry on if you are not there.

Who we are

Private Asset Management is an investment management service offered by TIAA, FSB, a subsidiary of TIAA, a Fortune 100 financial services leader. For 100 years, TIAA has been dedicated to serving the financial needs of those who work in the academic, medical, cultural and research fields.
Collaborative approach

Collaboration is key to reaching your goals

Collaboration can be a key component to achieving financial security. That’s why you have a dedicated advisor backed by a team of professionals to help you pursue your financial goals.

Through in-person meetings, telephone calls and electronic communications, you can contact us whenever you have questions, need advice or want easy access to your account online.

Your Private Asset Management team consists of an advisor, portfolio manager and trust administrator.

Your team works with specialists who are proficient in research, investment strategy, insurance and annuities, estate planning and other areas.
You and your team

Moving forward. Together as a team every step of the way.

Private Asset Management is a professionally managed solution that is built and continuously monitored based on your specific financial needs and concerns. Through a step-by-step process, we help you gain greater clarity and confidence that your investments are aligned with your goals and objectives. Here is how the team works together:

### Meet your team

<table>
<thead>
<tr>
<th>Role</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Your wealth management advisor</td>
<td>It starts with a dedicated advisor who works with you to gain a deep understanding of your personal financial goals—and what it will take to achieve these goals. Through the planning process, you and your advisor will discuss current and future financial needs and concerns for you, your family and your future.</td>
</tr>
<tr>
<td>Your portfolio manager</td>
<td>After collaborating with your advisor, your portfolio manager will create an investment strategy based on your priorities such as retirement, estate planning and charitable giving. Your portfolio manager works closely with our broader Investment Management Group to bring the full resources of TIAA to help develop an appropriate investment strategy.</td>
</tr>
<tr>
<td>Your trust administrator</td>
<td>Since your financial needs can be complex and require specialized knowledge in a variety of areas, your trust administrator can help simplify your life with a wide range of services related to estate planning considerations, retirement strategies, tax and bill payment assistance, and charitable gifts and trusts.</td>
</tr>
<tr>
<td>Wealth planning specialist</td>
<td>Available for more complex financial needs, a wealth planning specialist can help establish wills, trusts, power of attorney, beneficiary designations and asset titling. With permission, s/he will coordinate financial planning needs and activities with your outside attorneys and accountants.</td>
</tr>
<tr>
<td>Investment Management Group</td>
<td>Your portfolio is backed by a team of experienced financial professionals who employ a disciplined investment approach. They’re responsible for investment research and selection, asset allocation strategies, and rigorous monitoring and evaluation of investments and fund managers to ensure they continue to meet investment criteria.</td>
</tr>

The plan. The process. The path ahead.

Step 1  Establishing your goals

Step 2  Creating your asset allocation

Step 3  Building your portfolio

Step 4  Ongoing risk management & review
Planning toward your goals

A focused team. A clear process.

Step 1
Establishing your goals
With differing priorities and multiple financial goals, we’ll help to organize your investments accordingly. When discussing your goals and objectives, we’ll take into account your time frame for reaching each goal. We’ll consider your need for maintaining assets or for generating income along the way. With all of your detailed input, we’ll develop an Investment Policy Statement. It’s a well-defined plan for how your money will be invested and managed.

What are your financial objectives or goals for retirement?
What level of risk are you comfortable with?
Do you need to protect your assets from a down market?
Are you seeking to develop a plan for the financial future of your family and your legacy?

Step 2
Creating your asset allocation
Our process follows a set of clear steps that guides your portfolio manager in selecting appropriate investments according to your needs. Taking advantage of resources from the Investment Management Group, your portfolio manager will start with the appropriate asset allocation strategies.

During this step, your portfolio will be further customized with specific types of investments within each asset class to meet your specific personal goals, objectives and needs.

Step 3
Building your portfolio
Our investment strategy and process focuses on creating a solution that goes beyond your objectives and needs to also address your personal preferences. Your portfolio manager will use this framework to guide the selection of appropriate investments according to your comfort level for risk and other individual options.

What are your priorities: Generate income? Seek socially responsible investing? Minimize the tax burden? Reduce downside market risk exposure?
Do you have investments with large embedded capital gains?

Step 4
Ongoing risk management and review
You and your portfolio receive ongoing personalized attention. Your portfolio manager continually reviews and evaluates your portfolio—by individual investment and an overall basis.

We understand that your priorities and your life, may change over time. Your portfolio manager continually works with you to keep your portfolio balanced and aligned with your objectives, needs and preferences. To stay on track, we also review the time you’ve set to reach each goal.

Have any of your objectives or goals changed?
Have there been any significant life changes that affect your finances?
Do you have any new concerns that you want to address?
Investment strategy

Investment solutions as individual and diverse as you are

Since your goals and needs are unique to you, we tailor investment solutions to suit a wide range of individual preferences. To achieve this high level of customization, the Investment Management Group believes that disciplined management of high quality, diversified portfolios tailored to each client’s goals and objectives is an essential ingredient to the achievement of one’s long-term investment objectives—from asset allocation, to fund and securities research, to portfolio construction and management.

As your portfolio manager builds your portfolio, a broad selection of investment possibilities will be considered to help meet your different objectives, including those designed to:

- Seek to grow wealth
- Meet income needs
- Manage volatility to protect on the downside
- Provide tax management and efficiency where needed

The chart is a simplified illustration of how assets might be allocated among a variety of investment solutions. Your portfolio will be constructed to reflect your personal financial goals.

Selecting from a wide array of investment solutions

- 40% U.S. Equity
- 12% International Equity
- 44% U.S. Fixed Income
- 3% International Fixed Income
- 1% Cash
Screening to identify the right investments

Expect nothing less than highly rigorous due diligence from TIAA during each step of the investment process. We begin with in-depth research to identify the appropriate investments and funds for your portfolio from both TIAA and other investment organizations.

Our screening process seeks to discover the most appropriate fund managers in each asset category. Through a quantitative and qualitative review process, we look at risk and past performance in up and down markets. We conduct thorough, in-depth interviews with managers. Ultimately, we select and monitor mutual funds and exchange-traded funds believed to be most appropriate in each asset class.

Depending on what is most suitable for your portfolio, we select from a wide range of investment solutions, including mutual funds, exchange-traded funds, individual stocks and bonds.

We look at risk and past performance in up and down markets.
Management approach¹

Our approach is time-tested. Manage risk. Review. Rebalance.

Opportunities to build wealth by managing risk

At TIAA, we understand that you’ve worked many years to accomplish what you have today. That’s why we believe that the way to seek and preserve your wealth is to manage risk, as opposed to trying to outperform in unpredictable up markets.

Utilized by many investors, our strategy seeks to reduce losses during periods of uncertainty and volatility. As studies have shown, outperforming when markets are down is important to the long-term health of your portfolio. This is especially important if you need to make regular withdrawals over time. That’s why our strategy is to manage risk first, while striving to achieve consistent investment returns.

Always focused on your best interests

Whether you need everyday account services, tax-aware investing or estate planning and trust services, your team always manages your portfolio according to your best interests. On an ongoing basis, your portfolio is reviewed to reflect the way you live and the future you envision for yourself and your loved ones.

¹. No method of investing can ensure a profit or guarantee against loss.
Benefit from all the resources of TIAA

At TIAA, we firmly believe that the journey to financial well-being is a team effort between you and the people you trust. Working alongside you, we are committed to helping you pursue your goals each and every step of the way. No matter how your life—or the market—may change.

With Private Asset Management, you can feel confident that you have a dedicated team and all of the research, technology and resources of TIAA available to you.
