Estimate your expenses in retirement

Monthly expense worksheet

Start by listing your current expenses and then adjust the numbers up or down based on your best estimates for retirement. If you can, list "essential" and "discretionary" (extra) expenses separately. This can help you find ways to modify spending if necessary. If you're not sure what you can afford, start with your ideal scenario. Then, when you see what your income will be, you can adjust if necessary based on your priorities.

Enter amounts to the nearest dollar. Totals will be automatically calculated for you on page 4.

Estimate your income in retirement

Retirement income worksheet

Fill in your income sources below to determine how much income you may have for retirement. The "total monthly income needed" is automatically filled in from your monthly expense worksheet and cannot be filled in manually.¹

For lifetime and other monthly income sources, list the monthly amount you expect to receive. For retirement assets, list the total value of your savings. Many of these items will change over time, so be sure to review these amounts at least annually. All items shaded in blue are calculated automatically and cannot be filled in manually.
