NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Principles

The financial statements of Teachers Insurance and Annuity Association of America ("TIAA" or the "Company") are presented on the basis of statutory accounting principles prescribed or permitted by the New York State Department of Financial Services ("NYDFS" or the "Department"). The Department requires insurance companies domiciled in the State of New York to prepare their statutory basis financial statements in accordance with the National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* ("NAIC SAP"), subject to any deviation prescribed or permitted by the Department ("New York SAP").

The Department has adopted certain prescribed accounting practices that differ from those found in NAIC SAP. The Department did not adopt certain provisions in Regulation No. 172 (11 NYCRR 83). Specifically section 83.4(t) states, "The guidance prescribed in subparagraphs 4.a. and 4.b. of SSAP No. 26R, "Bonds" and Footnote 1 of SSAP No. 97, is not adopted." In effect, section 83.4(t) would exclude exchange traded funds ("ETFs") designated by the SVO as qualifying for bond accounting treatment from receiving such treatment in quarterly and annual financial statements filed in New York. However, the Company has received a permitted practice from the Department to continue to report investment grade bond ETF holdings held as of December 4, 2020 as bonds under SSAP No. 26R, Bonds ("SSAP 26R"), rather than as equities, for the year ended December 31, 2020. The total balance of investment grade ETF holdings held on Schedule D as of December 31, 2020 and 2019 are \$1,664,743,043 and \$1,048,741,560, respectively.

A reconciliation of the Company's net income and capital and contingency reserves between NAIC SAP and practices prescribed or permitted by the State of New York is shown below:

	SSAP#	F/S Page	F/S Line	12/31/2020	12/31/2019

Net Income, NAIC SAP				<u>\$ 602,105,346</u>	<u>\$ 1,617,743,164</u>
Capital and Contingency Reserves, New York SAP				\$ 40,001,276,931	\$ 38,871,795,611
New York SAP Prescribed Practices that are an increase/(decrease) from NAIC SAP:					
Deferred Premium Asset Limitation	51R, 61R	2	15.2	(50,730)	(66,643)
Additional Reserves for Term Conversions	51R	3	1	(19,585,434)	(21,142,617)

Non-Conforming CTL's Reported on Schedule BA...	INT 20-10	2	8	418,738,131	—
Capital and Contingency Reserves, NAIC SAP				<u>\$ 40,020,913,095</u>	<u>\$ 38,893,004,871</u>

The additional reserve for the term conversions results from the Department requiring in Regulation No. 147 (11NYCRR 98) Valuation of Life Insurance Reserves Section 98.4 for any policy which guarantees renewal, or conversion to another policy, without evidence of insurability, additional reserves shall be held that account for excess mortality due to anti-selection with appropriate margins to cover expenses and risk of moderately adverse deviations in experience.

The deferred premium asset limitation results from the NYDFS Circular Letter No. 11 (2010), which prescribed the calculation and clarified the accounting for deferred premium assets when reinsurance is involved.

The NAIC has adopted certain prescribed accounting practices within Interpretation 2020-10, Reporting Nonconforming Credit Tenant Loans ("CTL") ("INT 20-10"). Specifically, INT 20-10 states nonconforming CTLs may be treated as bonds and retained on Schedule D, rather than treated as other long-term investments and reported on Schedule BA, if they were previously filed with the Securities Valuation Office ("SVO").

The Company's risk based capital as of December 31, 2020 and December 31, 2019 would not have triggered a regulatory event without the use of the New York SAP prescribed practices.

B. Use of Estimates in Preparation of the Financial Statements

The preparation of the Company's statutory financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the period. Actual results may differ from those estimates.

NOTES TO FINANCIAL STATEMENTS

The outbreak of the novel coronavirus (“COVID-19”) and subsequent global pandemic began significantly impacting the U.S. and global financial markets and economies during March 2020. The worldwide spread of COVID-19 has created significant uncertainty in the global economy. The duration and extent of COVID-19 over the long-term cannot be reasonably estimated at this time. There have been no comparable recent events that provide guidance as to the effect the spread of COVID-19 as a global pandemic may have on the Company’s financial performance. The ultimate impact of COVID-19 and the extent to which COVID-19 impacts the Company’s business, results of operations, investments, and cash flows will depend on future developments, which are highly uncertain and difficult to predict.

C. Accounting Policy

Life premiums are recognized as income over the premium paying period of the related policies. Annuity considerations are recognized as revenue when received. Deposits on deposit-type contracts are recorded directly as a liability when received. Expenses incurred in connection with acquiring new insurance business are charged to operations as incurred.

Policy and contract reserves are determined in accordance with standard valuation methods approved by the Department and are computed in accordance with standard actuarial methodology. The reserves established utilize assumptions for interest, mortality and other risks insured. Such reserves are established to provide for adequate contractual benefits guaranteed under policy and contract provisions.

The Company has established policy reserves on deferred and payout annuity contracts issued January 1, 2001 and later that exceed the minimum amounts determined under Appendix A-820, "Minimum Life and Annuity Reserve Standards" of NAIC SAP. The excess above the minimum is as follows:

	12/31/2020	12/31/2019
Additional Reserves for:		
Deferred and payout annuity contracts issued after 2000.....	\$ 4,117,702,047	\$ 4,156,253,362

Dividends on insurance policies and pension annuity contracts in the payout phase are generally declared by the TIAA Board of Trustees (the "Board") in December of each year, and such dividends are credited to policyholders in the following calendar year. Dividends on pension annuity contracts in the accumulation phase and on certain payout annuities are generally declared by the Board in February of each year, and such dividends on the various existing vintages of pension annuity contracts in the accumulation phase are credited to policyholders during the ensuing twelve month period beginning March 1.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments (investments with remaining maturities greater than three months and less than or equal to 12 months at the time of acquisition, excluding those investments classified as cash equivalents) that are not impaired are stated at amortized cost using the straight line interest method. Short-term investments that are impaired are stated at the lower of amortized cost or fair value.
- (2) Bonds are stated at amortized cost using the constant yield method. Bonds in or near default (rated NAIC 6) are stated at the lower of amortized cost or fair value. NAIC ratings are applied to bonds and other securities. Categories 1 and 2 are considered investment grade, while Categories 3 through 6 are considered below investment grade. Bonds are recorded on a trade date basis, except for private placement bonds, which are recorded on the funding date. Bonds the Company intends to sell prior to maturity (“held for sale”) are stated at the lower of amortized cost or fair value.

If it is determined that a decline in the fair value of a bond, excluding loan-backed and structured securities, is other-than-temporary, the cost basis of the bond is written down to fair value and the amount of the write down is accounted for as a realized loss. The new cost basis is not changed for subsequent recoveries in fair value. Future declines in fair value which are determined to be other-than-temporary are recorded as realized losses.

Pursuant to the guidance in SSAP 26R, the Company holds SVO-Identified investment grade bond ETFs reported on Schedule D-1. For SVO-Identified investment grade bond ETFs, the Company reports these instruments at fair value and has not elected the use of the systematic value approach.

- (3) Unaffiliated common stocks are stated at fair value, which is based on quoted market prices, where available. Changes in fair value are recorded through surplus as an unrealized gain or loss. For common stocks without quoted market prices, fair value is estimated using independent pricing services or internally developed pricing models. When it is determined that a decline in fair value of an investment is other-than-temporary, the cost basis of the investment is reduced to its fair value and the amount of the reduction is accounted for as a realized loss.

NOTES TO FINANCIAL STATEMENTS

- (4) Preferred stocks are stated at amortized cost unless they have an NAIC rating designation of 4, 5, or 6 which are stated at the lower of amortized cost or fair value. The fair value of preferred stocks is determined using prices provided by independent pricing services or internally developed pricing models. When it is determined that a decline in fair value of an investment is other-than-temporary, the cost basis of the investment is reduced to its fair value and the amount of the reduction is accounted for as a realized loss.
- (5) Mortgage loans are stated at amortized cost, net of valuation allowances. Amortized cost consists of the unpaid principal balance of the loans, net of unamortized premiums, discounts and certain mortgage origination fees. Mortgage loans held for sale are stated at the lower of amortized cost or fair value. Mortgage loans are evaluated for impairment when it is probable that the receipt of contractual payments of principal and interest may not occur when scheduled. If the impairment is considered to be temporary, a valuation allowance is established for the excess of the carrying value of the mortgage over its estimated fair value. Changes in valuation allowance for mortgage loans are included in net unrealized capital gains and losses on investments. When an event occurs resulting in an impairment that is other-than-temporary, a direct write-down is recorded as a realized loss and a new cost basis is established. The fair value of mortgage loans is generally determined using a discounted cash flow methodology based on coupon rates, maturity provisions and credit assumptions.
- (6) Included within bonds are loan-backed and structured securities. Estimated future cash flows and expected prepayment speeds are used to determine the amortization of loan-backed and structured securities under the prospective method. Expected future cash flows and prepayment speeds are evaluated quarterly. Certain loan-backed and structured securities are reported at the lower of amortized cost or fair value as a result of the NAIC modeling process.

For loan-backed and structured securities which the Company has the intent and ability to hold for a period of time sufficient to recover the amortized cost basis, when an other-than-temporary impairment ("OTTI") has occurred because the Company does not expect to recover the entire amortized cost basis of the security, the amount of the OTTI recognized as a realized loss is the difference between the security's amortized cost basis and the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate.

For loan-backed and structured securities, when an OTTI has occurred because the Company intends to sell the security or the Company does not have the intent and ability to retain the security for a period of time sufficient to recover the amortized cost basis, the amount of the OTTI realized is the difference between the security's amortized cost basis and fair value at the balance sheet date.

In periods subsequent to the recognition of an OTTI loss for a loan-backed or structured security, the Company accounts for the other-than-temporarily impaired security as if the security had been purchased on the measurement date of the impairment. The difference between the new amortized cost basis and the cash flows expected to be collected is accreted as interest income in future periods based on prospective changes in cash flow estimates.

- (7) Investments in subsidiary, controlled and affiliated ("SCA") entities are stated at the value of their underlying net assets as follows: (1) domestic insurance subsidiaries are stated at the value of their underlying statutory surplus, and (2) non-insurance subsidiaries are stated at the value of their underlying audited GAAP equity. Dividends and distributions from subsidiaries are recorded in investment income to the extent that they are not in excess of the investee's undistributed accumulated earnings and changes in the equity of subsidiaries are recorded directly to surplus as unrealized gains or losses.
- (8) Investments in joint ventures, partnerships and limited liability companies are stated at cost adjusted for the Company's percentage of the most recent available financial statements based on the underlying U.S. Generally Accepted Accounting Principles ("GAAP") or International Financial Reporting Standards ("IFRS") as reflected on the respective entity's audited financial statements. The Company monitors the effects of current and expected market conditions and other factors on these investments to identify and quantify any impairment in value. The Company assesses the investments for potential impairment by performing analysis between the carrying value and the cost basis of the investments. The Company evaluates recoverability of the asset to determine if OTTI is warranted. When it is determined that a decline in fair value of an investment is other-than-temporary, the cost basis of the investment is reduced to its fair value and the amount of the reduction is accounted for as a realized loss.
- (9) The Company designates its derivative transactions as hedging or replication transactions. Derivatives that qualify and are designated for hedge accounting are reported as assets or liabilities on the balance sheet and accounted for in a manner consistent with the hedged item. Swap coupon cash flows and income accruals are reported as a component of net investment income. Upon termination, the gain or loss on these contracts is recognized in a manner consistent with the disposed hedged item.

NOTES TO FINANCIAL STATEMENTS

Derivatives used in hedging relationships that do not qualify or are not designated for hedge accounting are carried at fair value. Changes in fair value are reported in surplus as net unrealized capital gains (losses). Swap coupon cash flows and income accruals are reported as a component of net investment income. Upon termination the gain or loss on these contracts is recognized as realized capital gains (losses) and is subject to Interest Maintenance Reserve ("IMR") or Asset Valuation Reserve ("AVR") treatment.

Derivatives used in replication transactions are accounted for in a manner consistent with the cash instrument and the replicated asset. Accordingly, these derivatives are carried at amortized cost or fair value. Amortization of derivative premiums is reported as a component of net investment income. Swap coupon cash flows and income accruals are recorded as a component of net investment income. Upon termination, the gain or loss on these contracts is recognized as realized capital gains (losses) and is subject to IMR or AVR treatment.

The Company does not offset the carrying values recognized in the balance sheet for derivatives executed with the same counterparty under the same master netting agreement.

(10) The Company utilizes anticipated investment income as a factor in the premium deficiency calculation.

(11) Not applicable.

(12) The Company has not modified its capitalization policy from the prior period.

(13) Not applicable.

D. Going Concern

The Company does not have any doubt about its ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors

Accounting Changes

Adoption of New Accounting Standards

In June 2016, the NAIC adopted substantive revisions to Statements of Statutory Accounting Principles ("SSAP") No. 51R, Life Contracts ("SSAP 51R") to facilitate the implementation of principles-based reserving ("PBR"), effective January 1, 2020. Under PBR, the Company will be required to hold the higher of (a) the reserves for life using prescribed factors and (b) the PBR reserve which considers a wide range of future economic conditions, computed using justified company experience factors, such as mortality, policyholder behavior and expenses. The Company received a one year deferral on adopting PBR for life insurance from the Department and plans to request an exemption in 2021 as the Company's only new life business written is conversion from term policies. As a result, the Company did not adopt PBR for life insurance during 2020. If the Company had adopted PBR for life insurance it would not have had a material impact to its statutory-basis financial statements.

In April 2020, the NAIC adopted modifications to SSAP No. 15, Debt and Holding Company Obligations, SSAP No. 22R, Leases, and SSAP No. 86, Derivatives. These revisions adopt Financial Accounting Standards Board Accounting Standard Update ("ASU") No. 2020-04 Reference Rate Reform, which applies to contracts, hedging relationships, and other transactions that reference London Inter-Bank Offered Rate ("LIBOR") or another reference rate expected to be discontinued because of reference rate reform. Optional expedients eliminate the requirements for remeasurement or dedesignation of transactions, if certain criteria are met. The expedients are effective for the period from March 12, 2020 to December 31, 2022, which is consistent with the effective period of ASU 2020-04. The Company is still assessing the impact of the guidance on the statutory-basis financial statements.

In April 2020, the NAIC adopted modifications to SSAP No. 97, Investments in Subsidiary, Controlled and Affiliated Entities ("SSAP 97"). The adopted revisions clarify that reporting entities may apply the look-through approach for multiple levels of downstream holding companies to the extent that each of the downstream entities meets the requirements in SSAP 97. These revisions were effective immediately upon adoption. The Company adopted this guidance, and the adoption did not have a material impact to its statutory-basis financial statements.

In April 2020, the NAIC adopted modifications to SSAP No 5R, Liabilities, Contingencies and Impairments of Assets ("SSAP 5R"), and SSAP 97. The revisions to SSAP 5R specifically scope in Subsidiary, Controlled, and Affiliated Entities ("SCAs") that would normally be excluded from the financial guarantee recognition guidance when the SCA is in a negative equity position and the insurer has provided a financial guarantee. Under the adopted revisions, all SCAs would stop at "zero" regardless of the equity method losses and guarantees would be recognized, to the extent there is a financial guarantee or commitment, under SSAP 5R. These revisions were effective immediately upon adoption. The Company adopted this guidance, and the adoption did not have a material impact to its statutory-basis financial statements.

In April 2020, the NAIC adopted modifications to SSAP No. 36, Troubled Debt Restructuring ("SSAP 36"), through Interpretation 2020-03, Troubled Debt Restructuring Due to COVID-19 ("INT 20-03"). This guidance notes a

NOTES TO FINANCIAL STATEMENTS

mortgage loan or bank loan modification due to the impacts of COVID-19 on the borrower will not automatically be categorized as a troubled debt restructuring ("TDR"). To qualify for relief, the borrower must have been in good standing as of December 31, 2019 (not more than 30 days past due). This guidance expires at the earlier of 60 days after the date of termination of the National Emergency or January 2, 2022, which is the same end date as the Coronavirus Aid, Relief, and Economic Security ("CARES") Act. The Company has adopted this guidance and reflected it in its statutory-basis financial statements.

In May 2020, the NAIC adopted modifications to SSAP 26R, 36, 43R and 103R through Interpretation 20-07. This guidance clarifies how to determine when restructuring or modification of certain debt investments due to COVID-19 are a TDR. The guidance also clarifies whether a modification that is not a TDR needs to be assessed as an exchange under SSAP 103R. This guidance expires at the earlier of 60 days after the date of termination of the National Emergency or January 2, 2022, which is the same end date as the CARES Act. The Company has adopted this guidance and reflected it in its statutory-basis financial statements.

In May 2020, the NAIC adopted modifications to SSAP No 3, Accounting Changes and Corrections of Errors ("SSAP 3") and SSAP 51R. The adoption provides revisions to SSAP 3 and SSAP 51R with a January 1, 2020 effective date. The revisions require disclosure of changes in the reserve valuation basis, as a result of the NAIC Valuation Manual ("VM") in section VM-21 Requirements for Principle-Based Reserves for Variable Annuities ("VM-21"). Additionally, requirements for PBR for Variable Annuities are disclosed in a manner which is consistent with a change in valuation basis and with additional disclosures regarding the phase-in period. The Company adopted VM-21 during 2020 without a phase-in period and elected to use a factor based alternative method similar to the factor based alternative method used prior to 2020 in accordance with Actuarial Guideline 43 ("AG43"). Given the similar methodology under VM-21 and AG43, there was no impact from the change in the reserve valuation basis. Therefore, these required disclosures are not applicable to the Company's statutory-basis financial statements.

In August 2020, the NAIC adopted modifications to SSAP No. 68, Enhanced Goodwill Disclosures. The revisions add additional goodwill disclosures which are intended to improve the validity and accuracy of numbers currently being reported for goodwill and will assist with regulator review of reported assets not readily available for the payment of policyholder claims. The revisions primarily require the disclosure of the amount of goodwill assigned to downstream holding companies and do not provide new guidance on the determination, calculation or admissibility of goodwill. The guidance is effective January 1, 2021 and the Company will provide the additional required disclosure thereafter.

In November 2020, the NAIC adopted revisions to SSAP No. 43R, Loan-backed and Structured Securities, and was effective immediately. These revisions update the financial modeling guidance/mapping instructions for residential mortgage-backed securities ("RMBS")/commercial mortgage-backed securities ("CMBS") to ensure consistency with guidance recently adopted in the Purposes and Procedures Manual of the NAIC Investment Analysis Office ("P&P Manual"). The Company adopted this guidance, and it did not have a material impact to its statutory-basis financial statements.

6. Joint Ventures, Partnerships and Limited Liability Companies

- A. The Company has no investments in joint ventures, partnerships or limited liability companies that exceed 10% of its admitted assets.
- B. As of December 31, 2020, the Company recognized \$487,376,151 of OTTI on its investments in joint ventures, partnerships and limited liability companies. These investments are stated at cost adjusted for the Company's percentage of the changes in the underlying audited GAAP equity of the investee. For certain investments where audited GAAP basis financial statements are not available, the Company uses audited IFRS basis equity or audited US tax basis equity. An impairment is considered to have occurred if an event or change in circumstance indicates that the cost basis of the asset may not be recoverable or if there is limited ability to recover an unrealized loss. When an OTTI has been determined to have occurred, a realized loss is recorded to write the investment down to fair value.

7. Investment Income

- A. Due and accrued income was excluded from surplus on the following basis:
- Bonds – income due and accrued that is over 90 days past due.
- Preferred stocks – dividends due and accrued that are over 90 days past due.
- Common stocks – dividends due and accrued that are over 90 days past due and dividend amounts on affiliated common stocks related to real estate with rent over 90 days past due.
- Mortgage loans – income due and accrued on mortgages in default with interest 180 days past due which has been assessed as collectible.
- Real estate – income due and accrued related to rent that is in arrears for more than 90 days.
- B. The total amount excluded from income was \$0.

8. Derivative Instruments

- A. Derivatives under SSAP No. 86-Derivatives
1. The basic types of risks associated with derivatives are market risk (the value of the derivative will be adversely impacted by changes in the market, primarily the change in interest rates, credit spreads, and foreign currency exchange rates) and credit risk (the counterparty will not perform according to the terms of the contract). The market risk of derivatives should generally offset the market risk associated with the hedged asset or liability. The Company is exposed to credit-related losses in the event of non-performance by counterparties to the financial instruments, but it does not expect any counterparties to fail to meet their obligations given their high credit ratings. Derivatives may be

NOTES TO FINANCIAL STATEMENTS

exchange-traded or contracted in the OTC market. Certain of the Company's OTC derivatives are cleared and settled through central clearing counterparties ("OTC-cleared"), while others are bilateral contracts between two counterparties ("OTC-bilateral"). The counterparty credit exposure of derivatives is limited to the value of those contracts in a net gain position. The Company mitigates credit risk by entering into master agreements with its counterparties whereby contracts in a gain position can be offset against contracts in a loss position. Additionally, the Company typically enters into bilateral cross-collateralization agreements with its counterparties. These agreements require the counterparty in a loss position to submit acceptable collateral to the other counterparty in the event the net loss position meets or exceeds an agreed upon amount. See Schedule DB Part D for details of the Company's pledged collateral and counterparty exposure.

2. The Company uses a variety of derivatives to hedge risks that include interest rate risk, foreign currency risk, credit risk and commodity risk. Derivatives are also used to replicate the investment performance of otherwise permissible investments. Derivative instruments historically used by the Company include interest rate swaps, foreign currency swaps, foreign currency forwards, credit default swaps, asset swaps, total return swaps, and commodity forwards.

Interest Rate Swaps

The Company enters into interest rate swap contracts to economically hedge against the effect of interest rate fluctuations on certain variable interest rate bonds. The Company does not apply hedge accounting for these derivatives instruments.

Foreign Currency Swap Contracts

The Company enters into foreign currency swap contracts to exchange fixed and variable amounts of foreign currency at specified future dates and at specified rates (in U.S. dollars) as a cash flow hedge to manage currency risks on investments denominated in foreign currencies. The Company applies hedge accounting to certain of these derivatives instruments and fair value accounting to the majority of these derivatives instruments.

Foreign Currency Forward Contracts

The Company enters into foreign currency forward contracts to exchange foreign currency at specified future dates and at specified rates (in U.S. dollars) to manage currency risks on investments denominated in foreign currencies. The Company does not apply hedge accounting for these derivatives instruments.

Purchased Credit Default Swap Contracts

The Company purchases credit default swaps to hedge against unexpected credit events on selective investments held in the Company's investment portfolio. The Company pays a periodic fee in exchange for the right to put the underlying investment back to the counterparty at par upon a credit event by the underlying referenced issuer. Credit events are typically defined as bankruptcy, failure to pay, or certain types of restructuring. The Company does not apply hedge accounting for these derivatives instruments.

Written Credit Default Swaps used in Replication Transactions

Credit default swaps are used by the Company in conjunction with long-term bonds as replication synthetic asset transactions ("RSAT"). RSATs are derivative transactions (the derivative component) established concurrently with other investments (the cash component) in order to "replicate" the investment characteristics of another permissible instrument (the reference entity). The Company sells credit default swaps on single name corporate or sovereign credits, credit indices, or credit index tranches and provides credit default protection to the buyer. Events or circumstances that would require the Company to perform under a written credit default swap may include, but are not limited to, bankruptcy, failure to pay, debt moratorium, debt repudiation, debt restructuring, or default. The Company does not apply hedge accounting for these derivatives instruments.

Asset Swaps

The Company enters into asset swap contracts to hedge against inflation risk associated with its U.S. Treasury Inflation Protected Securities (TIPS). The Company also uses asset swap contracts in certain RSATs. For hedges of its TIPS, the Company pays all cash flows received from the TIPS security to the counterparty in exchange for fixed interest rate coupon payments. The Company applies hedge accounting for asset swaps used in hedging transactions, and does not apply hedge accounting for asset swaps used in RSATs.

NOTES TO FINANCIAL STATEMENTS

Total Return Swaps

The Company entered into total return swap contracts in conjunction with long-term bonds as part of its RSAT strategy. The Company does not apply hedge accounting for these derivatives instruments.

3. See Footnote 1.C.9 for further discussion of the Company’s derivatives accounting policies.
4. The Company does not enter into derivative contracts with financing premiums.
5. The Company had no amounts excluded from the assessment of hedge effectiveness during the current year.
6. The Company had no unrealized gains or losses during the current year resulting from derivatives that no longer qualify for hedge accounting.
7. The Company does not have any derivatives accounted for as cash flow hedges of forecasted transactions.

12. Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Post Retirement Benefit Plans

A. Defined Benefit Plan

The Company previously provided pension benefits through an unfunded Supplemental Executive Retirement Plan (“SERP”) to certain select executives and any TIAA associate deemed eligible by the Board of Trustees.

The SERP provided an annual retirement benefit payable at normal retirement calculated as 3% of the participant’s 5-year average total compensation based on an average of the highest five of the last ten years multiplied by the number of years of service not in excess of 15 years, less the annual initial benefit from Company contributions to the participant's basic defined contribution annuity contracts.

NOTES TO FINANCIAL STATEMENTS

The obligations of the Company under the SERP are unfunded, unsecured promises to make future payments. As such, the plan has no assets. Contributions for a given period are equal to the benefit payments for that period. The expected rate of return on plan assets is not applicable.

The Company provides certain other post-retirement life and health insurance benefits to eligible retired employees who meet prescribed age and service requirements.

The status of these plans for retirees and eligible active employees are summarized below:

For measurement purposes for the post-retirement plan, a 6.31% annual rate of increase in the per capita cost of covered pre-65 health care benefits was assumed for 2021. The rate was assumed to decrease gradually to 4.50% for 2030 and remain at that level thereafter.

- (8) The amount of accumulated benefit obligation for the defined benefit pension plan was \$37,821,962 and \$38,139,463 for the year ended December 31, 2020 and 2019, respectively.
- (9) The Company has multiple non-pension post-retirement benefit plans. The pre-65 health care plans are contributory, with participants' contributions adjusted annually; the post-65 health care plan and the life insurance plans are noncontributory. Post-retirement life insurance is offered only to those who retired prior to 2011. Company subsidies for the post-retirement health care plans, including post-65 annual HRA amounts, are offered to any who qualify for eligibility prior to 2015, after which newly qualifying retirees will pay the full cost of the health care plans. The accounting for health care plans anticipates future cost-sharing changes to the written plan consistent with the Company's express intent to reflect general health care trend rates in the employee premiums. For post-retirement medical, this is consistent with pre-65 trend rate assumptions of 6.31% for 2021 gradually scaling down to 4.50% in 2030. Company-provided HRA amounts are assumed to remain constant, and therefore no post-65 trend rate assumption applies.
- (10) The following estimated future payments, which reflect expected future service, as appropriate, are expected to be paid in the years indicated:

	Years	Postretirement Benefits	Pension Benefits
a.	2021.....	6,710,512	3,894,000
b.	2022.....	6,633,239	3,454,000

f.	2026 through 2030.....	23,491,000	12,433,000

- (11) The Company does not have any regulatory contribution requirements for 2021 and does not intend to make voluntary contributions to the defined benefit pension plan during 2021.
- (12)-(18) Not applicable.

B-D. Not applicable as the Company does not have any plan assets.

E. Defined Contribution Plans

The Company maintains a qualified, non-contributory defined contribution money purchase plan covering substantially all employees, including employees of Nuveen Services, LLC and TIAA, FSB. All employee pension plan liabilities are fully funded through retirement annuity contracts. Contributions are made to each participant's contract based on a percentage of salary, with the applicable percentage varying by attained age. Contributions are fully vested upon the earlier of (a) the time when the employee completes three years of service, (b) the date the employee attains age 65, or (c) the date of the employee's death. The accompanying statements of operations include contributions to the pension plan of approximately \$56,712,681 and \$58,113,612 in 2020 and 2019, respectively. This includes supplemental contributions made to Company-owned annuity contracts under a non-qualified deferred compensation plan.

The Company sponsors a defined contribution plan established to provide all of its employees with retirement income through a program of voluntary contributions. The Company matches contributions on 100% of the first 3% of base salary that an employee contributes into the plan. Participants are eligible to contribute to the Plan immediately on their first day of employment and are vested immediately in their contributions plus actual earnings thereon. Participants are fully vested in the Employer matching contributions upon the earlier of (a) the time when the employee completes three years of service, (b) the date the employee attains age 65, or (c) the date of the employee's death. The accompanying statements of operations include contributions to this plan of approximately \$16,342,923 and \$16,264,840 in 2020 and 2019, respectively.

The Company sponsors another defined contribution plan to provide all of its employees with funds to help cover qualified medical expenses after termination of employment through a program of voluntary

NOTES TO FINANCIAL STATEMENTS

contributions. A participant may contribute up to 100% of their base salary to the plan. These contributions are made on an after-tax basis by the participant. The Company matches 100% of the plan's participant contribution, up to \$750 annually. Participants are eligible to contribute to the plan immediately on their first day of employment and are vested immediately in their contributions plus actual earnings thereon. Participants are fully vested in the employer matching contributions upon the earlier of (a) the time when the employee completes three years of service, (b) the date the employee attains age 65, or (c) the date of the employee's death. The accompanying statements of operations include contributions to this plan of approximately \$1,591,549 and \$1,639,509 in 2020 and 2019, respectively.

Additionally, the Company maintains a non-qualified deferred compensation plan for non-employee trustees and members of the TIAA Board of Overseers. The plan provides an award equal to 50% of the annual stipend that is invested annually in company-owned annuity contracts. Payout of accumulations is normally made in a lump sum following the trustees' or member's separation from the Board.

The notes were issued in a transaction pursuant to Rule 144A under the Securities Act of 1933, as amended, and the notes are evidenced by one or more global notes deposited with a custodian for, and registered in the name of a nominee of, The Depository Trust Company.

NOTES TO FINANCIAL STATEMENTS

No subsidiary or affiliate of the Company is an obligor or guarantor of the notes, which are solely obligations of the Company. No affiliates of the Company hold any portion of the notes.

The notes are not scheduled to repay any principal prior to maturity. Each payment of interest and principal may be made only with the prior approval of the Superintendent and only out of the Company's surplus funds, which the Superintendent of the Department determines to be available for such payments under New York Insurance Law. In addition, provided that approval is granted by the Superintendent of the Department, the notes may be redeemed at the option of the Company at any time at the "make-whole" redemption price equal to the greater of the principal amount of the notes to be redeemed, or the sum of the present values of the remaining scheduled interest and principal payments, excluding accrued interest as of the redemption date, discounted to the redemption date on a semi-annual basis at the adjusted Treasury rate plus a pre-defined spread, plus in each case, accrued and unpaid interest payments on the notes to be redeemed to the redemption date.

(L)-(M) The Company has no restatement of surplus due to quasi-reorganizations.

14. Liabilities, Contingencies and Assessments

The funding of real estate investment obligations is contingent upon the properties meeting specific requirements, including construction, leasing and occupancy.

At December 31, 2020, outstanding commitments for equity investments were \$6,690,615,699. Of this, \$1,760,635,765 is scheduled for disbursement in 2021 and \$4,929,979,934 in later years. Equity investments represent fund investments and stocks.

(2) At December 31, 2020, the Company was obligor under the following guarantees indemnities and support obligations

Nature and circumstances of guarantee and key attributes, including date and duration of agreement.	Liability recognition of guarantee. (Include amount recognized at inception. If no initial recognition, document exception allowed under SSAP No. 5R.)	Ultimate financial statement impact if action under the guarantee is required.	Maximum potential amount of future payments (undiscounted) the guarantor could be required to make under the guarantee. If unable to develop an estimate, this should be specifically noted.	Current status of payment or performance risk of guarantee. Also provide additional discussion as warranted.
The Company has unconditionally guaranteed \$1,000 million in outstanding senior unsecured notes issued by Nuveen, LLC. The Company hereby agrees to cause any such payment to be made punctually when and as the same shall become due and payable, whether at maturity, upon acceleration, redemption, repayment or otherwise, and as if such payment were made by Nuveen LLC.	Guarantee made to/or on behalf of a wholly-owned subsidiary and as such are excluded from recognition.	Investment in Subsidiary, Controlled, or Affiliated	\$1,320,000,000	Based on Nuveen's financial position and operations, the Company views the risk of performance under this guarantee as remote.
Financial support agreement with TIAA Life to have (i) capital and surplus of \$250 million; (ii) the amount of capital and surplus necessary to maintain TIAA Life's capital and surplus at a level not less than 150% of the NAIC RBC model; or (iii) such other amounts as necessary to maintain TIAA Life's financial strength rating the same or better than TIAA's rating at all times.	Guarantee made to/or on behalf of a wholly-owned subsidiary and as such are excluded from recognition. At December 31, 2020, the capital and surplus of TIAA Life was in excess of the minimum capital and surplus amount referenced, and its total adjusted capital was in excess of the referenced RBC-based amount calculated at December 31, 2020.
Under the Conditional Purchase Agreements with each CLO ("Agreements"), TIAA agrees to acquire a loan subject to a trade executed for a related CLO in which TIAA is residual investor, if the loan does not meet the eligibility criteria for the CLO on the 15th calendar day following the trade date.	Exempt.	Expenses would increase	\$1,211,784	Based on the CLOs past performance and the current credit quality of the loans awaiting settlement the Company views the risk of performance under this guarantee to be remote.

See item (4) below for further discussion of the Company’s methods of mitigating credit risk with its derivatives counterparties.

See Schedule DB Part D Section 1 for details of the Company’s derivatives counterparty credit exposure.

- (4) The Company currently has International Swaps and Derivatives Association (“ISDA”) master swap agreements in place with each of its OTC-bilateral derivatives counterparties. The Company also transacts in OTC-cleared derivatives through central clearing counterparties. 20. Fair Value Measurements

A. Included in the Company's financial statements are certain financial instruments carried at fair value. Other financial instruments are periodically measured at fair value, such as when impaired, or for certain bonds and preferred stocks when carried at the lower of cost or fair value.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Fair values of financial instruments are based on quoted market prices when available. When quoted market prices are not available, fair values are primarily provided by a third party pricing service for identical or comparable assets, or through the use of valuation methodologies using observable market inputs. These fair values are generally estimated using discounted cash flow analysis, incorporating current market inputs for similar financial instruments with comparable terms and credit quality. In instances where there is little or no market activity for the same or similar instruments, the Company estimates fair value using methods, models and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve management estimation and judgment for many factors including market bid/ask spreads, and such estimations may become significant with increasingly complex instruments or pricing models.

The Company's financial assets and liabilities measured and reported at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100, Fair Value Measurements. The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Level 1 and Level 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

Level 1 – Inputs are unadjusted quoted prices in active markets for identical assets and liabilities that the Company has the ability to access at the measurement date.

Level 2 – Other than quoted prices within Level 1 inputs that are observable for the asset or liability, either directly or indirectly.

NOTES TO FINANCIAL STATEMENTS

Level 2 inputs include:

- Quoted prices for similar assets or liabilities in active markets,
- Quoted prices for identical or similar assets or liabilities in markets that are not active,
- Inputs other than quoted prices that are observable for the asset or liability,
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 – Inputs are unobservable inputs for the asset or liability supported by little or no market activity. Unobservable inputs reflect the Company’s own assumptions about the assumptions that market participants would use in pricing the asset or liability. The Company’s data used to develop unobservable inputs is adjusted if information is reasonably available without undue cost and effort that indicates that market participants would use different assumptions.

Considerable judgment is required to interpret market data in developing the estimates of fair value for financial instruments for which there are no available market value quotations. The estimates presented are not necessarily indicative of the amounts the Company could have realized in a market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

NAV Practical Expedient - TIAA has elected the NAV Practical expedient for certain investments held by its separate account. These investments are excluded from the valuation hierarchy, as these investments are fair valued using their net asset value as a practical expedient since market quotations or values from independent pricing services are not readily available. The separate account assets that have elected the NAV practical expedient represent investments in limited partnerships and limited liability companies that invest in real estate properties. The fair value, determined by the NAV practical expedient, of these assets was \$393,155,546 and total unfunded commitments was \$676,980,632 at December 31, 2020. For these investments, redemptions are prohibited prior to liquidation.

(5) a. Derivative assets and liabilities fair value disclosures on a gross basis are included in 20.A.1 above.

b. Since there are no derivative assets or liabilities measured and reported at fair value classified in Level 3, the reconciliation disclosures required under 20.A.2 and 20.A.3 are not applicable. For disclosures required under 20.A.4 see 20.B.

B. The estimated fair values of the financial assets and liabilities presented within this note are determined by the Company using market information available as of December 31, 2020. The following is a summary of the valuation techniques and inputs used in the fair value measurements for all financial instruments, including those assets and liabilities carried at fair value in the Company’s statement of financial position.

Level 1 financial instruments

Unadjusted quoted prices for these securities are provided to the Company by independent pricing services. Common stock, preferred stock, and separate account assets in Level 1 primarily include mutual fund investments valued by the respective mutual fund companies, exchange listed equities, and public real estate investment trusts. Bonds included in Level 1 represent SVO-identified exchange traded funds that qualify for bond treatment, which are valued using quoted market prices. Cash included in Level 1 represents cash on hand.

Level 2 financial instruments

Bonds included in Level 2 are valued principally by third party pricing services using market observable inputs. Because most bonds do not trade daily, independent pricing services regularly derive fair values using recent trades of securities with similar features. When recent trades are not available, pricing models are used to estimate the fair values of securities by discounting future cash flows at estimated market interest rates. Typical inputs to models used by independent pricing services include but are not limited to benchmark yields, reported trades, broker-dealer quotes, issuer spreads, benchmark securities, bids, offers, reference data, and industry and economic events. Additionally, for loan-backed and structured securities, valuation is based primarily on market inputs including benchmark yields, expected prepayment speeds, loss severity, delinquency rates, weighted average coupon, weighted average maturity and issuance specific information. Issuance specific information includes collateral type, payment terms of underlying assets, payment priority within the tranche, structure of the security, deal performance and vintage of loans.

Preferred stocks included in Level 2 include those which are traded in an inactive market for which prices for identical securities are not available. Valuations are based principally on observable inputs including quoted prices in markets that are not considered active.

Derivative assets and liabilities classified in Level 2 represent over-the-counter instruments that include, but are not limited to, fair value hedges using foreign currency swaps, foreign currency forwards, commodity forwards, interest rate swaps and credit default swaps. Fair values for these instruments are determined internally using market observable inputs that include, but are not limited to, forward currency rates, interest rates, credit default rates and published observable market indices.

Other invested assets in Level 2 are valued by a third party pricing vendor using primarily observable market inputs. Observable inputs include benchmark yields, reported trades, market dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data.

NOTES TO FINANCIAL STATEMENTS

Separate account assets in Level 2 consist principally of short-term government agency notes and corporate bonds.

Cash equivalents included in Level 2 are valued principally by third party services using market observable inputs.

Level 3 financial instruments

Valuation techniques for bonds included in Level 3 are generally the same as those described in Level 2 except that the techniques utilize inputs that are not readily observable in the market, including illiquidity premiums and spread adjustments to reflect industry trends or specific credit-related issues. The Company assesses the significance of unobservable inputs for each security and classifies that security in Level 3 as a result of the significance of unobservable inputs.

Estimated fair value for privately traded common equity securities are principally determined using valuation and discounted cash flow models that require a substantial level of judgment. Included in Level 3 common stock is the Company's holdings in the FHLBNY stock as described in Note 20 - FHLBNY Membership and Borrowings. As prescribed in the FHLBNY's capital plan, the par value of the capital stock is \$100 and all capital stock is issued, redeemed, repurchased, or transferred at par value. Since there is not an observable market for the FHLBNY's stock, these securities have been classified as Level 3.

Preferred shares are valued using valuation and discounted cash flow models that require a substantial level of judgment.

Mortgage loans are valued using discounted cash flow models that utilize inputs which include loan and market interest rates, credit spreads, the nature and quality of underlying collateral and the remaining term of the loans.

Derivatives assets and liabilities classified as Level 3 represent structured financial instruments that rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be corroborated by observable market data. Significant inputs that are unobservable generally include references to inputs outside the observable portion of credit curves or other relevant market measures. These unobservable inputs require significant management judgment or assumptions. Level 3 methodologies are validated through periodic comparison of the Company's fair values to external broker-dealer values.

Contract loans are fully collateralized by the cash surrender value of underlying insurance policies and are valued based on the carrying value of the loan, which is determined to be its fair value, and are classified as Level 3.

Separate account assets classified as Level 3 primarily include directly owned real estate properties, real estate joint ventures and real estate limited partnerships. Directly owned real estate properties are valued on a quarterly basis based on independent third party appraisals. Real estate joint venture interests are valued based on the fair value of the underlying real estate, any related mortgage loans payable and other factors such as ownership percentage, ownership rights, buy/sell agreements, distribution provisions and capital call obligations. Real estate limited partnership interests are valued based on the most recent net asset value of the partnership.

Separate account liabilities are accounted for at fair value, except the TIAA Stable Value Separate Account, which supports book value separate account agreements, in which case the assets are accounted for at amortized cost. Separate account liabilities reflect the contractual obligations of the insurer arising out of the provisions of the insurance contract.

Deposit-type contracts include funding agreements used in an investment spread capacity. Fair value of funding agreements is determined by discounted cash flow analysis using funding agreement interest rates as of the reporting date. Other deposit-type contracts are valued based on the accumulated account value, which approximates fair value. All deposit-type contracts are classified as Level 3.

F. Subprime Mortgage Related Risk Exposure

The Company’s exposure to subprime lending is limited to investments within its investment portfolio which are primarily in the form of Residential Mortgage-Backed Securities (“RMBS”) supported by subprime mortgage loans. Additionally, the Company does not underwrite nor does it hold any direct sub-prime mortgages. The Company manages its subprime risk exposure by limiting the Company’s holdings in these types of instruments, maintaining high credit quality investments, and performing ongoing analysis of cash flows, prepayment speeds, default rates and other stress variables. Loan-backed and structured securities not in default are held at amortized cost. Securities held for sale, or rated NAIC 6 are held at the lower of amortized cost or fair value. All securities are subjected to the Company’s process for identifying OTTIs. The impairment identification process utilizes various techniques and processes including a screening process based on declines in fair value and prospects for recovery. The Company writes down securities that it deems to have an OTTI in the period the securities are deemed to be impaired.

Furthermore, the Company does not have any underwriting exposure to subprime mortgage risk through Mortgage Guaranty or Financial Guaranty insurance coverage.

The following table presents the Company’s exposure to RMBS securities supported by subprime residential mortgage-backed loans as of December 31, 2020. The OTTI losses in the table below are inception-to-date.

35. Separate Accounts

A. Separate Account Activity

(1) TIAA utilizes separate accounts to record and account for assets and liabilities for particular lines of business and/or transactions. For the current reporting year, TIAA reported assets and liabilities from the Variable Annuity and Group Deferred Fixed Annuity product lines in a separate account.

In accordance with the domiciliary state procedures for approving items within the separate account, the separate account classification of the following items are supported by a specific state statute:

Product Identification	Product Classification	State Statute Reference
TIAA Separate Account VA-1	Variable Annuity	Section 4240 of the New York Insurance Law
TIAA Separate Account VA-2	Variable Annuity	Section 4240 of the New York Insurance Law
TIAA Separate Account VA-3	Variable Annuity	Section 4240 of the New York Insurance Law
TIAA Stable Value	Group Deferred Fixed Annuity	Section 4240(a)(5)(ii) of the New York Insurance Law

(2) In accordance with the products recorded within the separate account, some assets are considered legally insulated whereas others are not legally insulated from the general account. The legal insulation of the separate account assets prevents such assets from being generally available to satisfy claims resulting from the general account.

As of December 31, 2020, the Company's separate account statements included the following assets by product:

Product	Legally Insulated Assets	Separate Account Assets (Not Legally Insulated)
TIAA Separate Account VA-1	\$ 1,217,568,718	\$ —
TIAA Separate Account VA-2	23,457,983,132	—
TIAA Separate Account VA-3	15,658,626,132	—
TIAA Stable Value	2,472,207,667	—
Total	<u>\$ 42,806,385,649</u>	<u>\$ —</u>

(3) In accordance with the products recorded within the separate account, some separate account liabilities are guaranteed by the general account. (In accordance with the guarantees provided, if the investment proceeds are insufficient to cover the rate of return guaranteed for the product, the policy holder proceeds will be remitted by the general account.)

As of December 31, 2020, the general account of TIAA had a maximum guarantee for separate account liabilities of \$86,637. The amount paid for risk charges is not explicit, but rather embedded within the mortality and expense charge.

As of December 31, 2020, the general account of TIAA received \$7,969,518 from separate account guarantees. The total separate account guarantees paid (received) by the general account for the preceding four years ending at December 31, are as follows:

2019	\$	266,605
2018	\$	(1,369,509)
2017	\$	(1,128,012)
2016	\$	(2,023,146)

NOTES TO FINANCIAL STATEMENTS

The General Account provides the Real Estate Separate Account with a liquidity guarantee to ensure it has funds available to meet participant transfer or cash withdrawal requests. If the Real Estate Separate Account cannot fund participant requests, the General Account will fund them by purchasing accumulation units in the Real Estate Separate Account. Under this agreement, TIAA guarantees that participants will be able to redeem their accumulation units at their accumulation unit value next determined after the transfer or withdrawal request is received in good order. To compensate the general account for the risk taken, the separate account paid liquidity charges as follows for the past five (5) years:

2020	\$	59,448,863
2019	\$	57,842,693
2018	\$	50,517,677
2017	\$	47,022,033
2016	\$	38,411,067

(4) The Company engages in securities lending transactions through VA-1 and the REA.

As of December 31, 2020, VA-1 has loaned securities of \$5,497,875 and collateral of \$5,742,073. The collateral is inclusive of \$2,023,942 of non-cash collateral (primarily short-term US Treasuries), which is not reflected within the assets of VA-1 as VA-1 does not have the ability to sell or rehypothecate those securities. The fair value of the non-cash collateral is \$2,023,942. The REA has loaned securities of \$0 and collateral of \$144,233.

The Company’s Separate Accounts may lend securities to qualified institutional borrowers to earn additional income. The Separate Accounts receives collateral (in the form of cash, Treasury securities, or other collateral permitted by applicable law) against the loaned securities and maintains collateral in an amount not less than 102% of the market value of loaned securities during the period of the loan. Cash collateral received by the Separate Accounts will generally be invested in high quality short-term instruments, or in one or more funds maintained by the securities lending agent for the purpose of investing cash collateral. The Separate Accounts bear the market risk with respect to the collateral investment, securities loaned, and the risk that the counterparty may default on its obligations.

B. General Nature and Characteristics of Separate Accounts Business

Separate Accounts are established in conformity with insurance laws and are segregated from the Company's general account and are maintained for the benefit of separate account contract holders. Separate accounts are generally accounted for at fair value, except the Stable Value Separate Account ("TSV") products which are accounted for at book value.

VA-1 is a segregated investment account and was established on February 16, 1994 under the insurance laws of the State of New York for the purpose of issuing and funding (after tax) variable annuity contract primarily for employees of non-profit institutions organized in the United States, including governmental institutions. VA-1 is registered with the Securities and Exchange Commission, (the “Commission”) effective at November 1, 1994, as an open-end, diversified management investment company under the Investment Company Act of 1940. VA-1 consists of a single investment portfolio, the Stock Index Account (“SIA”). The SIA was established on October 3, 1994 and invests in a diversified portfolio of equity securities selected to track the overall market for common stocks publicly traded in the United States.

VA-2 is a segregated investment account and was organized on February 22, 1995, under the insurance laws of the State of New York for the purpose of providing an investment option to TIAA's pension customers to direct investments to an investment vehicle that invests primarily in real estate. VA-2 was registered with the Commission under the Securities Act of 1933 effective at October 2, 1995. VA-2’s target is to invest between 75% and 85% of its assets directly in real estate or in real estate-related investments, with the remainder of its assets invested in publicly-traded securities and other instruments that are easily converted to cash to maintain adequate liquidity.

VA-3 is a segregated investment account and was established on May 17, 2006 under the laws of the State of New York for the purposes of funding individual and group variable annuities for retirement plans of employees of colleges, universities, other educational and research organizations, and other governmental and non-profit institutions. VA-3 is registered with the Commission as an investment company under the Investment Company Act of 1940, effective at September 29, 2006, and operates as a unit investment trust.

The Separate Account supports a flexible premium group deferred fixed annuity contract that is offered to employer sponsored retirement plans.
